QUESTION 57

You have a custom entity. You need to add a date field that displays the date a user was hired. You must ensure that the value in the field remains the same, regardless of the time zone in which the field is viewed. What are two possible ways to configure the field? (Each correct answer presents a complete solution. Choose TWO.)

- A. Set the Behavior to User Local.
- B. Set the Format to Date Only.
- C. Set the Behavior to Time-Zone Independent.
- D. Set the Behavior to Date Only.

Answer: CD

QUESTION 58

You need to model a relationship between the account entity and the contact entity to track the advisory board members of accounts. You need to use connections to model the relationship between the account and contact entities. What should you do?

- A. Create a one-to-many (1:N) relationship between the account and contact entities, and then use two connection roles to represent each side of the new 1:N relationship.
- B. Create a connection entity, and then use two connection roles to represent each entity in the relationship.
- C. Use two connection roles to represent each side of the relationship.
- D. Create a many-to many (N:N) relationship between the account and contact entities, and then use two connection roles to represent each side of the new N:N relationship.

Answer: D

QUESTION 59

Your company rents tools and machines to customers. You create a custom entity named Equipment to track the tools and machines. You need to show the hierarchical relationships between various pieces of equipment. How should you configure the relationship?

- A. Ensure that you enable Connections for the entity.
- B. Set up a parental 1:N relationship between Accounts and Equipment.
- C. Create a self-referential relationship and configure hierarchy settings.
- D. Set up a N:N relationship between Accounts and Equipment.

Answer: C
