

## Microsoft MCSE Certification 70-339 Exam

- Vendor: Microsoft
- Exam Code: 70-339
- Exam Name: Managing Microsoft SharePoint Server 2016

**Get Complete Version Exam 70-339 Dumps with VCE and PDF Here**

<https://www.passleader.com/70-339.html>

**QUESTION 1**

You are a SharePoint administrator for Contoso, Ltd. The company acquires WingTip Toys. You must be able to manage and administer SharePoint site collections in the WingTip Toys SharePoint farm by using Windows PowerShell. You need to configure permissions for SharePoint site collection administrators. What should you do?

- A. Add the WingTip Toys SharePoint administrators to the Site Collection Administrators group.
- B. Add the Contoso, Ltd. SharePoint administrators to the Site Collection Administrators group.
- C. Add the Contoso, Ltd. SharePoint administrators to the SharePoint\_Sheii\_Access role.
- D. Add the WingTip Toys SharePoint administrators to the SharePoint\_Sheii\_Access role.

**Answer: C**

**QUESTION 2**

You are a SharePoint administrator for a company. You deploy OneDrive for Business on-premises. Files are explicitly shared with external users by sending email invitations. Users report that they cannot immediately view files in the OneDrive for Business Shared with Me view. You need to ensure that users can view all files as they are shared while minimizing the changes to the current service topology. What should you do?

- A. Enable the Recently Shared Items cache on the My Site server.
- B. Enable Continuous Crawl.
- C. Enable the Distributed Cache on all servers.
- D. Enable the Recently Shared Items cache on the Search server.

**Answer: A**

**QUESTION 3**

Hotspot Questions

You are a SharePoint administrator for Contoso, Ltd. You manage an on-premises SharePoint environment. A user named User1 is the site collection administrator for the Human Resources (HR) site. User1 leaves the company and is replaced with a user named User2. Access requests for the HR SharePoint site are still being sent to User1. You need to ensure that User2 receives all access requests to the HR site. How should you complete the Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment from each list in the answer area.

\$obj=    

Get-SPSite

Get-SPWeb

Get-SPSiteUrl

\$obj.RequestAccessEmail= "User2@contoso.com"

\$obj Update()  
Set-SPSite  
Set-SRWeb  
Set-SPSiteURL  
\$obj Close()

**Answer:**

\$obj=    

Get-SPSite

Get-SPWeb

Get-SPSiteUrl

\$obj.RequestAccessEmail= "User2@contoso.com"

\$obj Update()  
Set-SPSite  
Set-SRWeb  
Set-SPSiteURL  
\$obj Close()

#### QUESTION 4

Hotspot Questions

A company uses SharePoint2016 in a hybrid environment. You replace an administrator that has left the company. A vendor notifies you that the SSL certificate that you purchased from the vendor is expired. The hybrid environment is not able to authenticate domain users that attempt to access it. When accessing the online environment by using a cloud user account, you observe that Search is not returning results from the entire farm. You need to locate the expired certificates and renew them. What should you do? (To answer, select the appropriate certificate type of location from each list in the answer area. Note: Each correct selection is worth one point.)

Issue	Certificate type	Location
Domain users are unable to access online resources.	<div> <div>▼</div> <div>STS certificate wildcard SSL certificate secure channel certificate</div> </div>	<div> <div>▼</div> <div>Office 365 tenant reverse proxy server federation server domain controller</div> </div>
SharePoint Online search queries are not returning expected results.	<div> <div>▼</div> <div>STS certificate wildcard SSL certificate domain certificate</div> </div>	<div> <div>▼</div> <div>Office 365 tenant reverse proxy server federation server domain controller</div> </div>

**Answer:**

Issue	Certificate type	Location
Domain users are unable to access online resources.	<div> <div>▼</div> <div>STS certificate wildcard SSL certificate secure channel certificate</div> </div>	<div> <div>▼</div> <div>Office 365 tenant reverse proxy server federation server domain controller</div> </div>
SharePoint Online search queries are not returning expected results.	<div> <div>▼</div> <div>STS certificate wildcard SSL certificate domain certificate</div> </div>	<div> <div>▼</div> <div>Office 365 tenant reverse proxy server federation server domain controller</div> </div>

**QUESTION 5**

You are a SharePoint administrator for Contoso, Ltd. You manage a large SharePoint Server farm. You configure a single SharePoint Search application for the farm. The Search Service application has five crawl databases. All crawl databases have content. Contoso would like to crawl content from a partner company named WingTip Toys. This crawled content must be stored in a dedicated crawl database. You need to configure the environment. What should you do?

- A. Provision a new Search Server for the existing Search Service application.  
Add dedicated crawl components for WingTip Toys to the new Search Server.
- B. Create a dedicated Microsoft SQL Server instance for the WingTip crawl database.
- C. Add a crawl database to the existing Search Service application.
- D. Provision a new Search Service application.  
Configure the Search Service application to crawl WingTip Toys content.

**Answer: C**

**Explanation:**

Maximum crawl databases per Search Service application increased from 5 to 15 in SharePoint 2016.

[https://technet.microsoft.com/en-gb/library/cc262787\(v=office.16\).aspx](https://technet.microsoft.com/en-gb/library/cc262787(v=office.16).aspx)

**QUESTION 6**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine

whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You create App Management service, Managed Metadata service, and User Profile service applications. You create a web application and site collection for the My Site Host. You grant users the Create Personal Site and Follow People and Edit Profile permissions. Then, you create an audience for the users that will be redirected to Office 365. In the SharePoint Central Administration, you configure hybrid OneDrive for Business settings. Does this solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### **QUESTION 7**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You create and configure a User Profile service application and deploy an App Management service application. You deploy a My Site host collection. In SharePoint Central Administration, you create an audience. On the Configure hybrid OneDrive for Business settings page, you enter a value for the My Site URL field and specify the audience. Does this solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 8**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You configure the Managed

Metadata service and User Profile service applications. You create a My Site Host site collection. In SharePoint Central Administration, you grant the Create Personal Site and Follow People and Edit Profile permissions to users and configure hybrid OneDrive for Business settings. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 9**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features:

- Dashboards
- Scorecards
- Key Performance Indicators (KPI)

You configure Delve. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 10**

Drag and Drop Questions

You are the system administrator for a company. You have both Microsoft Exchange 2016 and SharePoint 2016 in your environment. You plan to integrate SharePoint and Exchange and use site mail boxes. You need to configure the environment to support site mail boxes. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Copy the Set-SiteMailboxConfig and Check-SiteMailboxConfig scripts to the SharePoint web front-end servers in the SharePoint farm. Then, run the Set-SiteMailboxConfig script.	
Copy the Set-SiteMailboxConfig and Check-SiteMailboxConfig scripts to the SharePoint web front-end servers in the SharePoint farm. Then, run the Check-SiteMailboxConfig script.	
Install the Exchange Server Web Services API on each Exchange front-end server.	
Install the Exchange Server Web Services API on each web front-end server in the SharePoint farm.	
On a SharePoint server, run the Configure-EnterprisePartnerApplication script.	
On an Exchange server, run the Configure-EnterprisePartnerApplication script.	

**Answer:**

Actions	Answer Area
	Install the Exchange Server Web Services API on each web front-end server in the SharePoint farm.
Copy the Set-SiteMailboxConfig and Check-SiteMailboxConfig scripts to the SharePoint web front-end servers in the SharePoint farm. Then, run the Check-SiteMailboxConfig script.	Copy the Set-SiteMailboxConfig and Check-SiteMailboxConfig scripts to the SharePoint web front-end servers in the SharePoint farm. Then, run the Set-SiteMailboxConfig script.
Install the Exchange Server Web Services API on each Exchange front-end server.	On an Exchange server, run the Configure-EnterprisePartnerApplication script.
On a SharePoint server, run the Configure-EnterprisePartnerApplication script.	

## Case Study 1 - Contoso, Ltd. (QUESTION 11 - QUESTION 14)

### Background

Contoso, Ltd. is a manufacturing company that serves the oil and gas industry. The company produces materials and chemicals that are used in the production of gasoline. Contoso has recently acquired several smaller companies including A.Datum, Litware, Inc., and Northwind Traders. Contoso has now grown from a local company to a company that has offices in multiple geographies. The company has the following offices:

Function	Secondary function	Name	Location	Number of employees	Content size in terabytes (TB)
Corporate HQ	IT	Contoso	Dallas	500	8 TB
Finance and Acquisitions	IT	A. Datum Corporation	London	100	4 TB
Manufacturing	Trading, Finance	Litware Inc.	Beijing	50	1 TB
Trading	Finance	Northwind Traders	New York	25	2 TB
Field Employees		N/A	Various locations worldwide	100	

### Corporate structure

Contoso is divided into business units based on their function primarily, and then by geographic region. The corporate language is English. Contoso has a major datacenter that is located near their Dallas facilities. A. Datum Corporation has a contract with a third-party datacenter in London, England. Contoso intends to move their environment fully to the cloud in the future, and will use SQL Databases in the cloud for business continuity. Contoso has, up until recently, handled all collaboration between employees using a single file share, email, USB flash drives, and local storage. With a growing need for global cooperation and collaboration, Contoso has elected to implement a SharePoint environment. You must minimize the cost for the solution.

### SharePoint environment

- Each business functional group requires a unique site collection. You must create child site collections for each geographical region that is part of the business functional group.
- The SharePoint taxonomy must follow the corporate structure.
- All existing corporate content must be migrated to the new SharePoint 2016 environment.
- The SharePoint environment must be accessible to all employees 24 hours a day, 7 days a week, and 365 days a year.

### Data

- You must retain all records for compliance reasons.
- You must share sales data by using Microsoft Excel. The sales data must be available online.
- The Beijing office must be able to share information to external partners.

### Employee requirements

- Employees must only use SharePoint Designer to edit SharePoint pages.
- Employees must be able to edit Excel workbooks in a browser.

- Employees must have access to PowerPivot.

### **Editing of SharePoint pages**

Contoso has decided that they will allow employees to edit SharePoint 2016 pages only by using SharePoint Designer. Employees must edit pages in a development environment that is located in Dallas. Changes must be applied to the production environment by using a backup/restore operation on the individual site collection. The development environment is an exact replica of the production environment.

### **Technical requirements**

#### **SharePoint requirements**

You identify the following requirements for the SharePoint environment:

#### **Backup and disaster recovery**

- The environment must be backed up at all times. You must not permit the loss of more than one hour of data.
- In the event of a disaster, the SharePoint environment must remain accessible to all employees. All disaster response and recovery plans and protocols will be available from the corporate SharePoint instance. The maximum acceptable downtime for the environment is four hours.
- In the case of failure, you must be able to restore the environment to any point within three weeks before the failure.

#### **SharePoint farm**

- You must ensure that specific offices can share content with external partners.
- You must log activities related to Power Pivot in the SharePoint usage logs.
- You must implement Search services from the on-premises farm.

#### **Deployment guidelines**

You have the following guidelines and protocols for implementing the SharePoint environment:

- You must install and configure all servers in an identical way.
- You must provision all site collections by using the SP Site. Copy method at the content database level. You must use reproducible and traceable methods to provisions sites.
- You must track information about SharePoint installations in Active Directory Domain Services.
- You must specify different service accounts for each service application.
- Users in the Dallas test environment must be able to create content databases on demand.

#### **Planned environments**

You plan to implement the following environments:

Datacenter	Environment	Function	Authorization
Dallas	SharePoint2016 On-premises	Primary site	All employees
Dallas	SharePoint2016 On-premises	Test environment	IT employees
Dallas	SharePoint2016 On-premises	Development environment	Dev employees, IT employees
Denver	SharePoint Online	Test environment for Office 365	IT employees
London	SharePoint2016 On-premises	High availability and failover	All employees
Hong Kong	SharePoint Online	Collaboration for China, Trading, and Finance	All employees in China, Trading, and Finance

#### Groups and accounts

You must create the following groups:

Account name:	Service application/role
IT admins	Monitor SharePoint 2016 and perform user administration tasks.
SharePoint installation	Install and configure SharePoint 2016
SQL admins	Administer SQL Server and provision SQL Server databases.

You must create the following service accounts:

Account name:	Service application/role
Network service	Office Online Services
SharePoint farm	Farm administrator
SQL admin	SQL Server Service account

#### Monitoring and management

You must implement monitoring for the following aspects of the SharePoint solution:

##### Security

You must be notified if administrator accounts are used to run application pools or if the server farm account is used for other services.

##### Performance

You must monitor database index fragmentation and whether the paging file size is sufficient.

##### Availability

You must monitor free space on drives and receive an alert if a drive is running out of space. You must also be notified if one or more servers are not responding.

#### SharePoint page performance

You must monitor the manufacturing, trading, and finance instances in Beijing for the any performance issues. You must also log attempts to connect to the instances from locations outside of the corporate network. Connectivity between Office 365 and the on-premises SharePoint 2016 environment. You must monitor connectivity between the two environments. Contoso is concerned that unauthorized users may gain access to sensitive information. You must log any attempts to access sensitive information. The company is especially interested in the logging the following actions:

- attempts to open documents that contain personal information
- editing sensitive documents
- printing sensitive documents

**QUESTION 11**

You need to monitor the resources for the Beijing office. Which three components should you implement? (Each correct answer presents part of the solution. Choose three.)

- A. Search
- B. Proxy Settings
- C. Distributed Cache
- D. SAML Authentication
- E. Claims Authentication

**Answer: BDE**

**QUESTION 12**

Drag and Drop Questions

You need to ensure that users can share sales data. For each authentication method, which option should you use? (To answer, drag the appropriate option to the correct authentication method. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.)

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	Option
SAML authentication	Authentication for Excel Online	Option
oData authentication	Authentication for PowerPivot	Option
network Service account		
Local Administrator account		
Authenticated users		

**Answer:**

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	network Service account
SAML authentication	Authentication for Excel Online	Authenticated users
oData authentication	Authentication for PowerPivot	Authenticated users
network Service account		
Local Administrator account		
Authenticated users		

**QUESTION 13**

Hotspot Questions

You need to create the managed paths for all site collections. For each site collection, which inclusion type should you use? (To answer, select the appropriate inclusion type from each list in the answer area.)

Site collection	Inclusion type
Corporate	<div>▼</div> <div>Explicit Wildcard</div>
IT	<div>▼</div> <div>Explicit Wildcard</div>
Finance	<div>▼</div> <div>Explicit Wildcard</div>
Trading	<div>▼</div> <div>Explicit Wildcard</div>
Manufacturing	<div>▼</div> <div>Explicit Wildcard</div>

**Answer:**

Corporate

**QUESTION 14**

You need to select the backup solution for Contoso. Which solution should you use?

- A. premium tier Azure backup
- B. Basic tier Azure backup
- C. an on-premises backup solution
- D. Standard tier Azure backup

**Answer: C**

**Case Study 2 - Blue Yonder Airlines (QUESTION 15 - QUESTION 24)**

**Background**

**General**

Blue Yonder Airlines manufactures, sells, and services small commercial jet aircraft. The company has offices worldwide. Blue Yonder currently uses both SharePoint2013 and SharePoint 2016. The company has a public website that is based on an ASP.NET web application.

**Service environment (SharePoint 2013)**

- The legacy SharePoint 2013 farm runs SharePoint Server 2013.
- This farm has over 200 site collections that are hosted on 20 content databases. There is no clear documentation that details which site collections are located in which content databases.
- The SQL Server for the SharePoint 2013 is ServerRole2013.

**Requirements**

**File metadata**

Every file stored within the system must contain the following common document properties:

- Document Status
- Department

- Author
- Enterprise Keywords

Values for the Document Status property must be displayed in English, Spanish, or French. The display language must be based on a user's language preferences. Additional fields or settings may be added in the future. You must be able to manage file metadata settings from a single location. When you make changes to settings, the changes must be applied to site collections and existing documents. This location must not be a part of the existing marketing, HR, or procurement team sites.

#### **Site collections**

Each departmental site must have a separate site collection. All departmental sites must be hosted in a single web application which is located at <http://sp.bluevonder.com>. Locations for the storage of personal documents for each employee should be created in a dedicated web application.

#### **Governance**

No custom development is permitted. Custom solutions must not be installed on the farm. Only configurations based on standard functionality are acceptable. Employees in the marketing, HR, and procurement departments are only permitted to have Read, Contribute, or Edit permissions to their sites.

#### **Human resources**

The human resources (HR) department is responsible for sharing information with all employees related to four themes: my work, my benefits, and my career. The naming of these themes may change overtime, and additional themes maybe added. It must be possible for someone from the HR team to edit the themes. The HR site on the intranet is divided into a top level site with three subsites. Each subsite represents a unique team. The global navigation of the HR site must feature a listing of the relevant themes and link to custom pages that list content for each theme. The site must not display links to subsites or other pages on the HR site.

#### **Team site URL**

The HR site must use the URL <http://hr.bluevonder.com>

#### **Marketing**

The marketing department will use SharePoint to publish brochures, marketing materials, and announcements. Only final versions of these documents maybe added to the marketing team site for sharing with other Blue Yonder employees. Once a file is published, employees must be able to access the file by using a consistent link even if the file is renamed or moved within the site.

#### **User file storage**

Files that are in draft mode must not be accessible to any user except the author until the file is ready for review. Each marketing employee must have a single location for storing draft work, work in progress materials, and other personal files. Files stored in this location must only be accessible to the employee that owns the area unless the employee chooses to share a file with other users. The storage location must be created automatically for an employee and must not require assistance from IT for configuration. The URL for each employees' site must be <http://employees.bluevonder.com/mv/personal/username>, where username represents the login of the employee.

#### **Public website**

The public website is not part of the SharePoint environment. It is a standalone ASP.NET website. Content on the public website, including news and job postings, is updated once a month. Information posted to the public website must be accessible by using search. Information stored in the Downloads section of the website must not be crawled due to the large size and the number of files.

#### **Team site URL**

The team site for The department must use the URL, <http://marketina.bluevonder.com>.

#### **Procurement**

The procurement department uses SharePoint to store contracts and related documents. You must store these documents in a few document libraries as possible. The documents may contain precedents or terms that are relevant for reuse. The procurement site stores over 20 million documents. The term store for the site contains two million terms.

#### **File storage**

Currently, the site consumes approximately 100 gigabytes (GB) of storage. This is expected to double within a year. It is expected that search will be a key feature for this group.

#### **Search**

When a search is conducted and a user hovers over the search result, the user must be able to easily launch the document, visit the library that is stored in, or preview the file. The links to the document and the library must appear above the preview of the file.

#### **Team site URL**

The site for the department must use the URL <http://procurement.bluevonder.com>

#### **Products**

The product team uses the legacy SharePoint 2013 farm. You must upgrade the farm to SharePoint Server 2016 so that the product team can take advantage of all the services that are available to the other departments. The existing products site is very active. You must ensure that users cannot change the site content during the upgrade process.

#### **SharePoint 2016**

##### **Logical Architecture**

- The SharePoint environment has two web applications. One web application is used for Departmental Collaboration, and the other is used for Central Administration.
- Each departmental site should be configured as a separate site collection.
- All departmental sites should be hosted within the same web application. The web application is accessible at the URL <http://sp.bluevonder.com>
- Locations for the storage of personal documents for each employee should be created in a dedicated web application.

##### **Server environment**

- The server farm is configured with SharePoint Server 2016 and Office Online Server. No additional addons or software packages are installed.
- The SQL Server for the SharePoint 2016 farm is ServerRole2016.
- The farm should leverage Min Role with a dedicated server for search.

#### **QUESTION 15**

You need to configure search for the marketing public website. What should you create?

- A. a Content type
- B. a SharePoint Site content source
- C. a Web Sites content source
- D. an Enterprise Search Center

**Answer: B**

#### **QUESTION 16**

Drag and Drop Question

You need to complete the configuration of the Search2016 farm. How should you complete the Windows PowerShell command? (To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

### Windows PowerShell segments

SPConfigurationDatabase
ServerRole2016
Search
Distributed cache
Search2016
Install-SPService
ServerRole2013

### Answer area

Connect	PowerShell segment
-DatabaseServer	PowerShell segment
-DatabaseName	SP2016Config
-Passphrase	C0mpany2919**
-LocalServerRole	PowerShell segment

**Answer:**

### Windows PowerShell segments

Distributed cache
Search2016
Install-SPService
ServerRole2013

### Answer area

Connect	SPConfigurationDatabase
-DatabaseServer	ServerRole2016
-DatabaseName	SP2016Config
-Passphrase	C0mpany2919**
-LocalServerRole	Search

### QUESTION 17

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to display the values for the Document Status and Department properties. You install a language pack. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**QUESTION 18**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to display the values for the Document Status and Department properties. You create a term set and Managed Metadata column. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**QUESTION 19**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to display the values for the Document Status and Department properties. You configure variations on the site. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**QUESTION 20**

You need to configure SharePoint to support the required common document properties. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Activate the Metadata Navigation and Filtering feature.
- B. In each site collection, define content types and site columns.
- C. Create a site collection. Define content types and site columns.
- D. Activate the Content Type Syndication Hub feature.
- E. Create a library. Create columns and save the library as a template.

**Answer: AE**

**QUESTION 21**

You need to ensure that employees can access published marketing materials. Which feature should you configure?

- A. Promoted Links
- B. Permission levels
- C. Managed paths
- D. Durable Links

**Answer: D**

**QUESTION 22**

You need to configure the environment to support the needs of the procurement team. What should you create?

- A. a display template
- B. a document library template
- C. a master page
- D. a search results page

**Answer: B**

**QUESTION 23**

Drag and Drop Question

You need to configure the HR site. For each requirement, which action should you perform? (To answer, drag the appropriate action to the correct requirement. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Actions		Answer area	
		Requirement	Action
Set site navigation to <b>Structured</b> .		Manage a central list of themes.	Action
Set site navigation to <b>Managed</b> .		Allow HR team members to edit themes.	Action
Add themes as links in navigation settings.		Display themes as global navigation links.	Action
Add themes as terms in the Term store.	•		
Add themes as items in a custom list.	•		
Grant HR team members Contribute access for the themes custom list.	•		
Set HR team members as contributors for the themes term set.	•		

**Answer:**

### Actions

Set site navigation to **Structured**.

Add themes as links in navigation settings.

Add themes as items in a custom list.

Grant HR team members Contribute access for the themes custom list.

### Answer area

#### Requirement

Manage a central list of themes.

Allow HR team members to edit themes.

Display themes as global navigation links.

#### Action

Add themes as terms in the Term store.

Set HR team members as contributors for the themes term set.

Set site navigation to **Managed**.

### QUESTION 24

Drag and Drop Question

You need to configure SharePoint Server URLs to allow access to the following sites:

- HR
- Marketing
- Procurement

For each site, which feature should you configure? (To answer, drag the appropriate feature to the correct site. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

### Features

a host header site collection

alternate access mappings

a content deployment path

service application associations

### Answer area

#### Site

Human Resources

Marketing team

Marketing employee

Procurement

#### Feature

Feature

Feature

Feature

Feature

**Answer:**

## Features

a host header site collection  
alternate access mappings  
a content deployment path  
service application associations

## Answer area

### Site

Human Resources  
Marketing team  
Marketing employee  
Procurement

### Feature

a host header site collection  
a host header site collection  
service application associations  
a content deployment path

## QUESTION 25

### Hotspot Questions

You are the SharePoint administrator for Contoso. You are establishing a disaster recovery (DR) location for the SharePoint farm. You plan to create service application databases for the DR environment that are configured to use read-only mode. You need to add the service applications to the passive farm. For each service application, which option should you implement? (To answer, select the appropriate option from each list in the answer area.)

### Service Application

### Option

User Profile

Failover SQL Server to the DR environment  
Grant the DR farm read and write access to the primary SQL Server  
Create a new database in the failover farm

Managed metadata

Failover SQL Server to the DR environment  
Grant the DR farm read and write access to the primary SQL Server  
Create a new database in the failover farm

**Answer:**

Service Application

Option

User Profile

Failover SQL Server to the DR environment

Grant the DR farm read and write access to the primary SQL Server

Create a new database in the failover farm

Managed metadata

Failover SQL Server to the DR environment

Grant the DR farm read and write access to the primary SQL Server

Create a new database in the failover farm

#### QUESTION 26

Drag and Drop Questions

You are assisting Company1 in the development of a website that displays information about their products to customers on the Internet. Company1 web publishers will not have access to publish directly to the Internet site. You have the following requirements:

- Web publishers must be able to update web pages from a SharePoint site collection that is only accessible on the Company1 internal network.
- Web page updates must be published on an automated basis to a SharePoint site collection that is accessible from the Internet.

You need to configure the website. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

**Actions**

Configure content type publishing	
Create a content deployment job	
Configure content sources	
Create source and destination site collections	
Create a content deployment path	
Create publishing content types	

**Answer:**

**Actions**

Configure content type publishing	Create source and destination site collections
Configure content sources	Create a content deployment path
	Create a content deployment job
Create publishing content types	

**QUESTION 27**

A college plans to enable personal sites for all users. All personal sites will be created in a dedicated web application. All staff, faculty members, and students have access to the same SharePoint environment. You need to ensure that only college staff and faculty members can create personal

sites. What should you do?

- A. Manage user permissions for the User Profile service application.
- B. Define site app permissions for the intranet site collection.
- C. Manage organization subtypes for the User Profile service application.
- D. Define permission levels for the intranet collection.

**Answer: A**

**QUESTION 28**

Drag and Drop Questions

You provision and configure a new SharePoint farm. The farm has not been backed up. You need to back up all services applications in the farm. How should you complete the Windows PowerShell command? (To answer, drag the appropriate Windows PowerShell segment to need to drag the split bar between panes or scroll to view content.)

Windows PowerShell segment	Answer Area
Differential	<pre>Backup [ ] -Directory\\srv01\backup\ -BackupMethod [ ] - [ ] Item</pre>
Farm	
Farm\Shared Services

Farm\Shared Services  
Item

### QUESTION 29

#### Hotspot Questions

You are an administrator for a company. You manage the company's SharePoint environment. You also manage SQL Server and file system backups. All SQL instances run SQL Server 2014 SP1. The data analytics team releases a custom reporting and analytics solution. You need to provide a backup plan for the custom reporting and analytics solution. In the table below, identify the component that you can back up for each backup method. (Note: Make only one selection in each column. Each correct selection is worth one point.)

Component	SQL Server backups	File system backups
Web Applications	<input type="radio"/>	<input type="radio"/>
Customizations not deployed as solution packages	<input type="radio"/>	<input type="radio"/>
SharePoint list items	<input type="radio"/>	<input type="radio"/>
SharePoint content databases	<input type="radio"/>	<input type="radio"/>
SQL Server Reporting Services databases	<input type="radio"/>	<input type="radio"/>

**Answer:**

Component	SQL Server backups	File system backups
Web Applications	<input type="radio"/>	<input checked="" type="radio"/>
Customizations not deployed as solution packages	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint list items	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint content databases	<input checked="" type="radio"/>	<input type="radio"/>
SQL Server Reporting Services databases	<input checked="" type="radio"/>	<input type="radio"/>

### QUESTION 30

Drag and Drop Questions

You are planning to create a high availability solution for your company's SharePoint environment. The company requires:

- the shortest possible recovery time
- automatic failover
- the usage of multiple subnets

You need to recommend a solution to the company's management team. For each requirement, what should you recommend? (To answer, drag the appropriate SQL Server options to the correct requirement. Each SQL Server option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.)

SQL Server options	Requirement	SQL Server option
a failover cluster only	Shortest possible time to recovery	SQL Server options
an AlwaysOn Availability Group only	Automatic failover	SQL Server options
a high-availability mirror only	Use multiple subnets	SQL Server options
a failover cluster, an AlwaysOn Availability Group, and a high-availability mirror.		

**Answer:**

**Answer Area**

SQL Server options	Requirement	SQL Server option
<input type="text"/>	Shortest possible time to recovery	<input type="text" value="a failover cluster only"/>
<input type="text"/>	Automatic failover	<input type="text" value="a failover cluster, an AlwaysOn Availability Group, and a high-availability mirror."/>
<input type="text" value="a high-availability mirror only"/>	Use multiple subnets	<input type="text" value="an AlwaysOn Availability Group only"/>
<input type="text"/>		

**QUESTION 31**

You are the administrator for a SharePoint 2016 farm. You need to integrate Microsoft System Center Operations Manager dashboards and real-time diagnostic data with the SharePoint 2016 farm. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Configure Microsoft SharePoint Insights.
- B. Configure Visio Services.
- C. Configure System Center Integration with Office 365 by using private cloud integration.
- D. Deploy the Microsoft System Center Operations Manager SharePoint web part.

**Answer: BD**

**QUESTION 32**

Hotspot Questions

You administer the SharePoint2016 farm for a company. Servers for the farm are distributed between the company's main office and a branch office. You must make new custom solution packages to all SharePoint Servers in the farm. In the table below, identify the method to use for each group of servers. (Note: Make only one selection in each column. Each correct selection is worth one point.)

Method	Main office	Branch office
Deploy	<input type="radio"/>	<input type="radio"/>
Publish	<input type="radio"/>	<input type="radio"/>
Upgrade	<input type="radio"/>	<input type="radio"/>

**Answer:**

Method	Main office	Branch office
Deploy	<input checked="" type="radio"/>	<input type="radio"/>
Publish	<input type="radio"/>	<input checked="" type="radio"/>
Upgrade	<input type="radio"/>	<input type="radio"/>

### QUESTION 33

Drag and Drop Questions

You are a SharePoint administrator for Contoso, Ltd. You are migrating a SharePoint 2010 farm to SharePoint 2016. The SharePoint 2010 farm has only classic mode web applications. You observe that the WSS\_Content\_Project Archive content database is not attached to the SharePoint 2013 farm. You need to migrate the SharePoint 2010 WSS\_Content\_Project Archive content database to an existing SharePoint 2013 claims-based web application named WebApp1. Which four actions should you perform in sequence? (To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.)

Attach the WSS\_Content\_ProjectArchive content database to WebApp1.

Attach the WSS\_Content\_ProjectArchive content database to ClassicAuthApp.

Run the following Windows PowerShell command:  
Convert-SPWebApplication-Identity WebApp1-To Claims-RetainPermissions

Run a Windows PowerShell script to convert WebApp1 to a classic mode web application while retaining permission settings.

Run the following Windows PowerShell command:  
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1")

Attach the SharePoint 2010 project archive content database to ClassicAuthApp.

Run the following Windows PowerShell command:  
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1") -AuthenticationProvider (New-SPAuthenticationProvider)

Run the following Windows PowerShell command:  
Convert-SPWebApplication-Identity ClassicAuthApp -To Claims- RetainPermissions

**Answer:**

Run the following Windows PowerShell command:

```
New-SPWebApplication-name  
"ClassicAuthApp"-Port 100  
-ApplicationPool "ClassicAuthAppPool"  
-ApplicationPoolAccount (Get-  
SPManagedAccount "contoso\User1")
```

Attach the WSS\_Content\_ProjectArchive content database to ClassicAuthApp.

Run the following Windows PowerShell command:

```
Convert-SPWebApplication- Identity  
ClassiAuthApp  
-To Claims- RetainPermissions
```

Attach the WSS\_Content\_ProjectArchive content database to WebApp1.

#### QUESTION 34

You are the administrator for a SharePoint 2016 farm. You configure a connection to the SharePoint Store. Users report that they cannot select or install specific apps from the SharePoint Store. Users can install other apps. You need to allow all users to purchase and install any type of apps from the SharePoint Store. What should you do?

- A. Activate the Internet-facing endpoints feature for apps.
- B. Configure the Store settings to allow users to purchase apps.
- C. Deploy an App Catalog.
- D. Delete the existing App Catalog. Then, delete and provision the Subscription Setting and App Management service applications.

**Answer: A**

#### QUESTION 35

During the upgrade from SharePoint 2013 to SharePoint 2016, you discover there is a missing feature. You review the logs and observe the following error message:

Message: Database [WSS\_Contoso\_ORO1] has reference(s) to a missing feature: id= (4be9a980-965f786f-9eda-074e284875d7).

Remedy: The feature with id 4be9a980-965f-486f-9eda-074e284875d7 is referenced in the database [WSS\_Contoso\_ORO1], but is not installed on the current farm.

The missing feature may cause upgrade to fail. Please install any solution which contains the feature and restart upgrade if necessary. You need to identify the page that is missing the feature. Which of the following will identify the page?

- A. On the SharePoint Server, run the following Windows PowerShell command:  
Test-SPContentDatabase-NameSdbName-WebApplication \$wa | Select Category, Message | Where {\$\_.Category-eq "MissingFeature"}
- B. On the SharePoint Server, run the following Windows PowerShell command:  
Test-SPContentDatabase-NameSdbName-WebApplication \$wa | Select Category, Message |

Where{\$\_.Category-eq "MissingSetupFile"}

- C. On the SQL Server, run the following SQL syntax against WSS\_Contoso\_OROI:  
SELECT FeatureId, FullURL From WebsInner JOIN FeaturesOn Webs.Id=Features.WebId WHERE  
FeatureId='4be9a980-965f-486f-9eda-074e284875d7'ORDERBYFeatureId
- D. On the SharePoint Server, review the Health Analyzer and find the missing dependencies

**Answer: A**

### QUESTION 36

Drag and Drop Questions

You are the SharePoint administrator for your organization. You have one web application named WebApp1 in the farm. You need to prevent users from purchasing apps from the SharePoint Store while allowing users to request apps from the App Catalog. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Create an App Catalog in the farm.

Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to **No**.

Publish the app to the catalog site.

Create an App Catalog site collection in WebApp1.

Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to **Yes**.

Add the app to the catalog site.

➤  
➡

⬅  
⬇

**Answer:**

Create an App Catalog in the farm.

Create an App Catalog site collection in WebApp1.

Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to **No**.

### QUESTION 37

Drag and Drop Questions

You manage the SharePoint 2016 environment for a multinational company with 195 offices in 57 different regions. Each department in the company has its own site collection. Business users have Contribute access to their own department sites and Read access to all other department sites. You have the following requirements:

- Maintain a standardized list of office locations across all departments.
- Track the office location as metadata for contract documents that are stored in each of the departmental site collections.
- Business users must be able to add new office locations directly when they save new files to SharePoint.
- When a user adds a new office location, the location information must be accessible to all users for use on other documents.

You need to configure SharePoint to track office location for contract documents. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Configure the column to allow multiple values.	
Create a managed Metadata site column based on the Term Set.	
Configure the Column to allow any value.	
Import the office locations to a custom list and grant edit access to all users.	
Import the office locations list to the Term Store and set the value of the term Set to Closed.	
Import the office locations list to the Term Store and set the value of the Term Set to Open.	
Configure the column to display a drop-down list.	

**Answer:**

Import the office locations list to the Term Store and set the value of the Term Set to Open.
Create a managed Metadata site column based on the Term Set.
Configure the Column to allow any value.

### QUESTION 38

Drag and Drop Questions

You are the administrator for a company's SharePoint 2016 farm. Employees use Search functionality extensively. Employees report that display as they enter queries are often irrelevant.

[70-339 Exam Dumps](#) [70-339 Exam Questions](#) [70-339 PDF Dumps](#) [70-339 VCE Dumps](#)

[Back to the Source of this PDF & Get More Free Braindumps -- www.microsoftbraindumps.com](#)

You identify the following requirements:

- You must add several specific search refiners to Search results pages.
- You must expand query results by using synonyms for search keywords.
- You need to implement the improvements to search functionality.

For each requirement, which action should you perform? (To answer, drag the appropriate action to the correct requirement. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.)

Actions	Requirement	Action
Create and deploy a thesaurus.	Expand queries with synonyms.	Action
Configure authoritative pages.	Set up custom refiners.	Action
Manage query rules.	Edit phrases that are shown to users as they start typing a query.	Action
Manage query spelling correction.		
Create custom entity extractors.		
Manage query suggestion.		

**Answer:**

Requirement	Action
Expand queries with synonyms.	Create and deploy a thesaurus.
Set up custom refiners.	Create custom entity extractors.
Edit phrases that are shown to users as they start typing a query.	Manage query suggestion.

### QUESTION 39

Hotspot Questions

You are a SharePoint administrator. You set up a publishing website that is based on product catalogue data. You are configuring Search to retrieve and display content from the publishing website. Content managers have site collection administrator permissions. You need to ensure that multiple crawls can occur for the same content at the same time. What should you do? (To answer, select the appropriate value from each list in the answer area.)

Search administrators must enable the following crawl type:

full crawl

continuous crawl

Role that must initiate a full index of the catalog:

site owner

content managers

**Answer:**

Search administrators must enable the following crawl type:

full crawl

continuous crawl

Role that must initiate a full index of the catalog:

site owner

content managers

#### QUESTION 40

Drag and Drop Questions

A company uses SharePoint Online and SharePoint Server 2016 on-premises. You need to configure two-way federated search between SharePoint Online and SharePoint Server on-premises. How should you configure federated search? (To answer, drag the appropriate option to the correct result source and remote providers. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.)

**Answer Area**

Products	Federated Search	Result source	Remote provider
SharePoint 2016	Outbound search	Product	Product
SharePoint Online	Inbound search	Product	Product

**Answer:**

	Federated Search	Result source	Remote provider
Outbound search		SharePoint 2016	SharePoint Online
Inbound search		SharePoint Online	SharePoint 2016

**QUESTION 41**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features:

- Dashboards
- Scorecards
- Key Performance Indicators (KPI)

You install and configure Office Online Server. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**QUESTION 42**

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the

stated goals.

You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features:

- Dashboards
- Scorecards
- Key Performance Indicators (KPI)

You configure Power BI. Does the solution meet the goal?

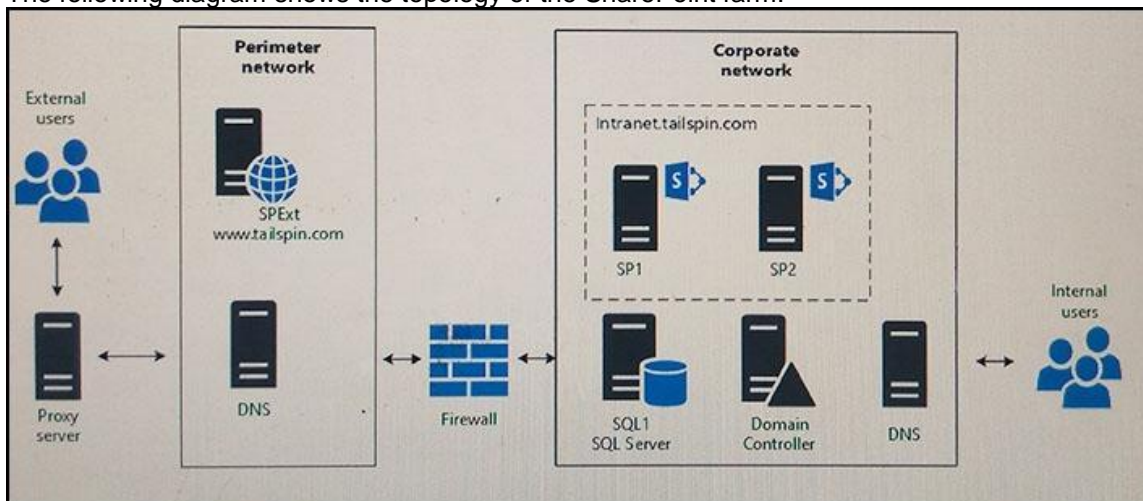

- A. Yes
- B. No

**Answer: B**

### Case Study 3 - Tailspin Toys (QUESTION 43 - QUESTION 52)

#### Background

Tailspin Toys manufactures and sells toys and games. The company also resells board games. The new chief executive officer (CEO) recently launched an effort to update the company's information technology (IT) infrastructure. The CEO wants a blog site to provide updates in plain text about the progress of company projects and the overall health of the company to employees. Content from this site will be used to populate some content on the internet-facing site. You hire a consultant to design and deploy a SharePoint farm. The company plans to use the farm to create internal collaboration sites, and e-commerce site, and a place to display public announcements. The following diagram shows the topology of the SharePoint farm:

#### General

You must create a separate site collection for each department. You must base each site collection on the Team site template. The direct URL for each site collection must use the following format: <http://departmentname.tailspin.com>. You must place the site collections for all departments in the same web application, if possible. You must place the site collection for departments that have unique requirements in separate web applications.

#### Business continuity

You identify the following requirements related to continuity of the business:

- All SharePoint services must be highly available.
- The SharePoint environment must be able to withstand the failure of a single system without affecting accessibility.

You must monitor the SharePoint environment to ensure that systems are available and that

response times meet service level agreements (SLAs). In the event the times are not within the required thresholds, the system must alert SharePoint administrators. You must create a site that allows department managers to view the performance data that has been collected. The use of additional monitoring software will be performed where it can be justified.

### **Governance and security**

#### **Governance requirements**

- Marketing department employees may create team sites. All other sites must be created by members of the information technology (IT) administration staff.
- You must handle requests for new sites by using a Help Desk site on SharePoint.
- The corporate taxonomy must be managed by the SharePoint administrative staff. Users must not be allowed to create their own information architecture. Exceptions to this requirement will be handled on a case by case basis.
- All information in SharePoint must be consistently identified and readily accessible by using searches. Search components must be configured to provide the best search results while minimizing administrative overhead.

#### **Security requirements**

Anonymous access is only permitted for Internet-facing sites. Authentication is required for all sites. Authentication must occur through the Active Directory Domain Services environment. All custom apps must be installed and managed by the SharePoint administrative staff. Any requests for new apps must be submitted through the Help Desk site.

### **Hardware and storage**

#### **Hardware requirements**

You must minimize the number of servers and applications whenever possible. You must only deploy additional servers and applications if the requesting department manager provides the appropriate documentation to support the need.

#### **File storage requirements**

Content must not be stored in the perimeter network. All access to SharePoint content from the Internet must be handled through servers in the perimeter network. Human resources (HR) data must be kept separate from all other data.

### **HR department**

The HR manager needs a website to implement time management and leave requests. The HR manager has found an app that will provide this functionality on a SharePoint independent software vendor website, and would prefer to use this app as opposed to creating a custom in-house app. This app will only need to access to data in the HR site collection. You must create a site for the HR department that allows new employees to read required documents regarding policies and procedures. The site must also provide all employees access to other HR documentation such as the employee handbook, employee leave procedures, and acceptable use guides.

### **IT department**

You must implement a Help Desk website and associated workflows. To create the site, you must access data from a Microsoft Excel workbook into a SQL Server database by using an SQL Server Integration Services (SSIS) package. You must access data from other data sources. Employees must be able to fill out a help request on the site and then check the status of the request. The IT department staff must be able to respond to the requests, update the status of requests, and close requests. IT department managers must be able to track the status of requests, and generate reports on the progress of requests.

### **Marketing department**

#### **Collaboration sites**

Marketing department employees must be able to create their own collaboration sites in SharePoint. The collaboration sites will be used for new product release discussions and marketing plans related to those new products. The URL for the collaboration sites must use the format: /products/productname.

### Custom terms

The marketing department must be able to use custom terms when identifying marketing strategies. Other departments must not be able to use custom terms. This requirement has been approved by management.

### Public-facing sites

You must create a site for the marketing department that provides information to potential customers about the current product line and any products in development. The marketing team must be able to access this site by using their mobile devices.

### Sales department

The sales manager needs a site to display sales progress data. The site must include KPIs and metrics that are generated by using information from a database stored on a SQL Server. Sales department employees are often away from the office. They must be able to access SharePoint data from external locations and when they are offline. Sales department employees need a site that customers can access to purchase products and check on the status of orders.

### QUESTION 43

#### Hotspot Questions

You need to deploy the HR app. Which options should you recommend? (To answer, select the appropriate setting from each list in the answer area.)

### Answer Area

Deployment component	Option
Method	<div>▼</div> <ul style="list-style-type: none"> <li>The site owner must add the app from a list of available apps for the site.</li> <li>The site owner must add the app from the App Catalog.</li> <li>The SharePoint administrator must add the app from the SharePoint Store.</li> <li>The SharePoint administrator must install the app by using Windows PowerShell.</li> </ul>
App permission request scope	<div>▼</div> <ul style="list-style-type: none"> <li>SPSite</li> <li>SPWeb</li> <li>SPList</li> <li>Tenancy</li> </ul>

### Answer:

### Answer Area

Deployment component	Option
Method	<div>▼</div> <ul style="list-style-type: none"> <li>The site owner must add the app from a list of available apps for the site.</li> <li>The site owner must add the app from the App Catalog.</li> <li><b>The SharePoint administrator must add the app from the SharePoint Store.</b></li> <li>The SharePoint administrator must install the app by using Windows PowerShell.</li> </ul>

**QUESTION 44**

You need to implement the Sales Progress website. Which service application should you create and configure?

- A. a Business Data Connectivity Service application
- B. an Application Management Service application
- C. the Access Service 2010 service application
- D. the PerformancePoint Service application

**Answer: D**

**QUESTION 45**

You need to implement the HR department site collection. What should you do first?

- A. Create a wildcard inclusion managed path in the HR web application.
- B. Create a web application for the HR department.
- C. Create a wildcard inclusion managed path in the web application for the departments.
- D. Create a content database in the web application for the departments.

**Answer: B**

**QUESTION 46**

Drag and Drop Questions

You need to deploy the web application to support the marketing department. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Create a teams managed path for the web application.	<input type="text"/>
Enable Self-Service Site Creation for all departmental web applications.	<input type="text"/>
Enable Self-Service Site Creation for the marketing department web application.	<input type="text"/>
Create a products managed path for the web application.	
Enable anonymous access for the web application.	 
Create a web application for all departments.	 
Create a web application for the marketing department.	

**Answer:**

Actions	Answer Area
Create a teams managed path for the web application.	Create a web application for the marketing department.
Enable Self-Service Site Creation for all departmental web applications.	Create a products managed path for the web application.
	Enable Self-Service Site Creation for the marketing department web application.
Enable anonymous access for the web application.	
Create a web application for all departments.

#### QUESTION 47

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to monitor the environment. You configure System Center Operations Manager 2012 R2 with a web application monitor. Does the solution meet the goal?

- A. Yes.
- B. No.

**Answer: A**

#### QUESTION 48

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to monitor the environment. You run the following Windows PowerShell cmdlet:

```
Set-SP Log Level
```

Does the solution meet the goal?

- A. Yes

B. No

**Answer: B**

**QUESTION 49**

You need to publish the CEO blog site to the public-Internet facing site. What should you do?

- A. Configure PowerPoint Automation Services to deploy site content.
- B. Create and configure a content deployment job.
- C. Configure Word Automation Services to deploy site content.
- D. Configure Machine Translation Services to deploy site content.

**Answer: B**

**QUESTION 50**

You need to obtain the external data required for the Help Desk website. What should you use?

- A. Business Data Connectivity Services application
- B. an Office 365 REST endpoint
- C. Microsoft Power BI
- D. a Content Query web part

**Answer: A**

**QUESTION 51**

You need to configure the web application that will support the marketing department collaboration sites. What should you implement?

- A. an alternate access mapping for each productname value
- B. a wildcard inclusion managed path
- C. an explicit inclusion managed path
- D. a new web application for each productname value

**Answer: B**

**QUESTION 52**

Hotspot Question

You need to implement the Managed Metadata Service (MMS) application for the websites. For each website, which MMS configuration option should you use? (To answer, select the appropriate option from each list in the answer area. NOTE: Each correct selection is worth one point.)

## Answer Area

Website	MMS configuration option
Marketing	<div>▼</div> <div>a new MMS term store</div> <div>a new MMS term group</div> <div>an open term set</div> <div>a closed term set</div>
Sales	<div>▼</div> <div>a new MMS term store</div> <div>a new MMS term group</div> <div>an open term set</div> <div>a closed term set</div>

**Answer:**

## Answer Area

Website	MMS configuration option
Marketing	<div>▼</div> <div>a new MMS term store</div> <div>a new MMS term group</div> <div>an open term set</div> <div>a closed term set</div>
Sales	<div>▼</div> <div>a new MMS term store</div> <div>a new MMS term group</div> <div>an open term set</div> <div>a closed term set</div>

### QUESTION 53

Hotspot Questions

You are the SharePoint administrator for a company. You have an on-premises SharePoint 2016 farm and an Office 365 SharePoint Online environment. The SharePoint Online environment uses a search index. You configure a Search Service application (SSA). You need to plan the integration between the SSA to the Office 365 tenant. For each step, which action should you perform? (To answer, select the appropriate option from each list in the answer area.)

1.

▼

Configure an Azure Access Control Service allocation proxy.  
Create a new managed account.  
Create a SharePoint claims provider.

2.

▼

Register a trusted security token.  
Create a trusted root authority.  
Register a new claims provider.

3.

▼

Publish the local service application  
Configure the SharePoint Service host.  
Configure a SharePoint Service application proxy.  
Create a new SharePoint subscription service proxy.

**Answer:**

1.

▼

Configure an Azure Access Control Service allocation proxy.  
Create a new managed account.  
Create a SharePoint claims provider.

2.

▼

Register a trusted security token.  
Create a trusted root authority.  
Register a new claims provider.

3.

▼

Publish the local service application  
Configure the SharePoint Service host.  
Configure a SharePoint Service application proxy.  
Create a new SharePoint subscription service proxy.

**QUESTION 54**

**Drag and Drop Questions**

A company uses SharePoint Server 2016 to manage documents and Microsoft Exchange Server 2013 for email. The company's legal and compliance team wants to be able to place holds on content to restrict data loss. The legal and compliance team has the following requirements:

- Team members must be able to search Exchange content from within SharePoint, including employee email messages.
- Team members must be able to export data by performing a single action.
- This content must only be accessible to the team members after you verify that the environment is configured properly.

You need to configure the SharePoint environment. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Create a Search Center and share the center with the legal and compliance team.	
Create a SharePoint content source.	
Create an Exchange content source.	
Configure a trust between SharePoint and Exchange.	
Create an eDiscovery Center and share the center with the legal and compliance team.	
Create a SharePoint result source.	
Create an Exchange result source.	

⏪ ⏩

**Answer:**

Actions	Answer Area
Create a Search Center and share the center with the legal and compliance team.	Configure a trust between SharePoint and Exchange.
Create a SharePoint content source.	Create an Exchange content source.
	Create an eDiscovery Center and share the center with the legal and compliance team.
	 
Create a SharePoint result source.	
Create an Exchange result source.	

**QUESTION 55**

You are an administrator for an on-premises SharePoint 2016 farm. A partner organization needs access to some of the resources in the farm. The partner organization does not use Windows Active Directory and does not have third-party signed certificates. The partner organization does not have the personnel or expertise to set up and manage a public key infrastructure (PKI). The partner organization can supply you with a file that lists the users who need access to your SharePoint farm. All access to SharePoint resources must be authenticated. You need to configure authentication for the partner organization. What should you do?

- A. Configure forms-based authentication.
- B. Configure a federated relying party trust.
- C. Configure a cross-forest trust.
- D. Configure anonymous access.

**Answer: A**

**QUESTION 56**

You are the SharePoint administrator for Contoso, Ltd. You deploy a new team site for the Marketing department to the company's SharePoint environment. The manager for the Marketing department must be able to add and manage groups in the new site. You need to grant the correct permissions to the manager while minimizing administrative impact. Which permission level should you grant to the manager?

- A. Designer
- B. Approver
- C. Site administrator
- D. Contributor
- E. Site Collection administrator

**Answer: C**

**QUESTION 57**

You manage the term store for a company's on-premises SharePoint farm. You plan to replicate the production environment term store to a development environment. When you attempt to export the term store from the production environment, you receive the following error message:

You do not have permission to use the bulk load statement.

You need to complete the import of the term store. What should you do?

- A. Add the SharePoint farm administrator account to the SQL Server security administrator role.
- B. Grant the FullControl permissions to the farm administrator account for the \\MySharedLocation\MMS folder.
- C. Use an account that has the SQL administrator role assigned to it to perform the task.
- D. Add the MMS Service account to the SQL Server bulk admin role.

**Answer: B**

**QUESTION 58**

A company plans to migrate a custom task tracking solution to SharePoint Online. The solution includes customized master pages, timer jobs, and content by query web parts. You need to migrate the solution to SharePoint Online and maintain long-term support for the solution. What should you do?

- A. Set all content by query web parts to use unthrottled requests.
- B. Replace all content by query web parts with content search web parts.
- C. Re-write the solution as a sandboxed solution.
- D. Re-write the solution as an app.

**Answer: C**

**QUESTION 59**

A company has an on-premises SharePoint farm. The company also uses SharePoint Online. Employees must be able to access on-premises sites and SharePoint Online resources. You must use single sign-on (SSO). You need to configure authentication. Which three options should you configure? (Each correct answer presents part of the solution. Choose three.)

- A. Windows Azure directory synchronization without Password Sync
- B. server to server authentication
- C. Active Directory Federation Services 2.0 with SSO
- D. forward proxy configuration
- E. Windows Azure directory synchronization with Password Sync

**Answer: CDE**

**QUESTION 60**

You administer a company's SharePoint Online environment. The environment hosts several site collections that are used to store documents that contain sensitive customer information. A user in the customer relationship department must share a document that contains scheduling and project information with multiple external vendors. The document contains scheduling and project information. You need to ensure that the external vendors can access and collaborate on the document. What should you do?

- A. Share the site containing the collaboration document and require sign-in.
- B. Share the document and do not require sign-in.
- C. Create a document library for the document and require sign-in.
- D. Share the document and require sign-in.

**Answer: D**

### QUESTION 61

Hotspot Questions

You plan to install SharePoint Server 2016 in a new environment. You need to install the SharePoint Server prerequisite components. For each prerequisite installation method, which tool or command line utility should you use? (To answer, select the appropriate tool or command line utility from each list in the answer area.)

#### Answer area

Prerequisite installation method	Tool or command line utility
Install from a network share	<div>▼</div> <div>Setup.exe</div> <div>PrerequisiteInstaller.exe</div> <div>SharePoint Products Configuration Winzard</div> <div>Microsoft SharePoint Products and Technologies 2016 Preparation Tool</div>
Install from the Internet	<div>▼</div> <div>Setup.exe</div> <div>PrerequisiteInstaller.exe</div> <div>SharePoint Products Configuration Winzard</div> <div>Microsoft SharePoint Products and Technologies 2016 Preparation Tool</div>

**Answer:**

#### Answer area

Prerequisite installation method	Tool or command line utility
Install from a network share	<div>▼</div> <div>Setup.exe</div> <div>PrerequisiteInstaller.exe</div> <div>SharePoint Products Configuration Winzard</div> <div>Microsoft SharePoint Products and Technologies 2016 Preparation Tool</div>
Install from the Internet	<div>▼</div> <div>Setup.exe</div> <div>PrerequisiteInstaller.exe</div> <div>SharePoint Products Configuration Winzard</div> <div>Microsoft SharePoint Products and Technologies 2016 Preparation Tool</div>

### QUESTION 62

Drag and Drop Questions

Your company plans to move team sites from an on-premises SharePoint environment to the cloud. You register a custom domain with Office 365. You need to configure the Office 365 environment for the hybrid infrastructure before you configure the on-premises environment. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Run the Hybrid Picker

Assign licenses to users.

Assign UPN domain suffixes

Synchronize user accounts with Office 365

Create a synchronization connection with Active Directory Domain Services for the User Profile Service.

**Answer:**

Run the Hybrid Picker

Assign licenses to users.

Assign UPN domain suffixes

Create a synchronization connection with Active Directory Domain Services for the User Profile Service.

Synchronize user accounts with Office 365

**QUESTION 63**

Your organization has a complex retention schedule that clearly defines retention policies for all document types. Each department has its own SharePoint site. In many cases, a single document library on a department site may contain financial files, human resources files, and project

documentation. The following table lists the retention policies that are in place.

Content type	Retention policy
Financial records	Delete files after five years.
Human resources files	Archive files after four years.
Project documentation	Retain files for three years after the project end date.

You must administer retention rules from a single location for each type of document and must leverage out of the box functionality. You need to configure the SharePoint environment to comply with the retention schedule. What should you do?

- A. Configure information management policies for the document libraries.
- B. Activate the Disposition Approval feature.
- C. Activate the In-Place Records Management feature.
- D. Configure information management policies on content types.
- E. Activate library and folder-based retention.

**Answer: D**

**QUESTION 64**

A company plans to deploy a SharePoint 2016 farm. The company only has enough budget to purchase four SharePoint Server licenses and two SQL Server licenses. The farm must be highly available. You need to deploy the SharePoint 2016 farm. Which two server role sets can you use? (Each correct answer presents a complete solution. Choose two.)

- A. Two front-end servers and two custom servers.
- B. Two front-end servers and two application servers.
- C. One front-end server, one application server, and two custom servers.
- D. One front-end server, one application server, one Search Server, and one Distributed Cache server.

**Answer: AB**

**Explanation:**

[https://technet.microsoft.com/en-us/library/mt346114\(v=office.16\).aspx](https://technet.microsoft.com/en-us/library/mt346114(v=office.16).aspx)  
[https://technet.microsoft.com/en-us/library/mt743704\(v=office.16\).aspx](https://technet.microsoft.com/en-us/library/mt743704(v=office.16).aspx)

**QUESTION 65**

You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value. In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department. You need to create a column that supports the requirements. What should you do?

- A. Create a Choice site column that uses check boxes.
- B. Create a Choice site column that uses a drop-down menu.
- C. Create a Managed Metadata site column.
- D. Create a Choice list that uses a drop-down menu.

**Answer: B**

**Explanation:**

<http://en.share-gate.com/blog/start-learn-sharepoint-advanced-column-types>

**QUESTION 66**

Hotspot Questions

Your development team deploys a new SharePoint Store app that interacts with the user by using an IFRAME. When the user loads a SharePoint page, the IFRAME is empty. You need to ensure that the SharePoint Store app loads properly. How should you configure authentication and authorization for the app? (To answer, select the appropriate option from each list in the answer area.)

**Answer Area**

Authentication	Authorization
self-signed certificate	user permissions
Microsoft Azure Active Directory Access Control	app and user permissions

**Answer:**

**Answer Area**

Authentication	Authorization
self-signed certificate	user permissions
Microsoft Azure Active Directory Access Control	app and user permissions

**QUESTION 67**

Drag and Drop Questions

You manage a SharePoint environment. You need to block all ports on the SharePoint Servers that are not used for essential communications. (To answer, drag the appropriate set of port ranges to the correct service. Each set of ports ranges may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.)

**Ports and Protocols**

TCP 9354, TCP 9355, TCP 9356
TCP 32843, TCP 32844, TCP 32845
TCP 5725
TCP 16500-16519
TCP/UDP 53
TCP/UDP 88
TCP 22233-22236

**Answer Area**

Service	Ports and Protocols
Service Applications	Ports and Protocols
People Search / MIM	Ports and Protocols
Search Index component	Ports and Protocols
Name resolution	Ports and Protocols
Kerberos	Ports and Protocols

**Answer:**

**Ports and Protocols**

TCP 9354, TCP 9355, TCP 9356

TCP 22233-22236

**Answer Area**

**Service**

**Ports and Protocols**

Service Applications

TCP 32843, TCP 32844, TCP 32845

People Search / MIM

TCP 5725

TCP/UDP 88

**QUESTION 68**

You deploy a SharePoint2016 environment. You configure outgoing email settings for all SharePoint Servers. You need to enable encrypted communication between all SharePoint Servers and the enterprise SMTP server. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Configure the SMTP server to support the TLS 1.0, TLS 1.1, or TLS 1.2 protocols.
- B. Install a server certificate on the SharePoint Server.
- C. Configure the SMTP server to support the SSL 2.0 or SSL 3.0 protocols.
- D. Enable STARTTLS encryption on the SharePoint Servers.
- E. Enable STARTTLS encryption on the enterprise SMTP server.

**Answer: AE**

**QUESTION 69**

Hotspot Questions

You manage a SharePoint farm for Contoso, Ltd. You create a managed account for a User Profile service application. You need to provision User Profile service application and attach its proxy to the default group. How should you complete the Windows PowerShell commands? (To answer, select the appropriate Windows PowerShell segment from each list in the answer area.)

**Answer Area**

**\$appPool = New-SPServiceApplicationPool -Name "Userprofile" -Account"**

contoso\AppPoolUserAccount  
(Get-SPManagedAccount "contoso\AppPoolUserAccount")  
(Set-SPManagedAccount "contoso\AppPoolUserAccount")  
(New-SPManagedAccount-Credential (Get-Credential "contoso\AppPoolUserAccount"))

**\$userProfile =**  **-ApplicationPool \$appPol -Name "UPS"**

New-SPProfileServiceApplicationProxy  
New-SPProfileServiceApplication  
Set-SPProfileServiceApplicationProxy  
Set-SPProfileServiceApplication

**New-SPProfileServiceApplicationProxy -ServiceApplication \$userProfile**

**-Name "UPSPProxy"**

-URI  
-Confirm  
-Partition Mode  
-DefaultProxyGroup

**Answer:**

**Answer Area**

**\$appPool = New-SPServiceApplicationPool -Name "Userprofile" -Account"**

contoso\AppPoolUserAccount  
(Get-SPManagedAccount "contoso\AppPoolUserAccount")  
(Set-SPManagedAccount "contoso\AppPoolUserAccount")  
(New-SPManagedAccount-Credential (Get-Credential "contoso\AppPoolUserAccount"))

**\$userProfile =**  **-ApplicationPool \$appPol -Name "UPS"**

New-SPProfileServiceApplicationProxy

**-Name "UPSPProxy"**

-URI  
-Confirm  
-Partition Mode  
-DefaultProxyGroup

**Case Study 4 - Contoso, Ltd. (QUESTION 70 - QUESTION 75)**

**Current environment**

**Overview**

You are the SharePoint administrator for a manufacturing company named Contoso, Ltd. You have the following environments:

Location	Department	Main site collection	Farm version
Boston	Corporate Headquarters	http://Boston.contoso.com/sites/corp	SharePoint 2013
Chicago	Finance	http://Chicago.contoso.com/sites/Finance	SharePoint 2016
Dallas	Sales	http://Dallas.contoso.com/sites/Sales	SharePoint 2016
Denver	Warehouse	http://Denver.contoso.com/sites/warehouse	SharePoint 2013
Atlanta	Marketing	http://Atlanta.contoso.com/sites/Marketing	None
Detroit	Development	http://Detroit.contoso.com/sites/Development	SharePoint 2016
Seattle	Information Technology	http://Seattle.contoso.com/sites/IT	SharePoint 2016

Each site collection uses a unique content database.

#### Details

##### Dallas

You configure a My Sites host site collection at the URL <http://dallas.contoso.com/personal>. The Dallas site collection also hosts a web application that will be used exclusively by sales department employees for creating customer sites. Employees access the site at the URL <http://customer.contoso.com>.

##### Chicago

The Chicago location has a primary datacenter and a secondary datacenter.

##### Denver

Some of the sites in the Denver site collection run in SharePoint 2010 mode.

##### Atlanta

The Atlanta site collection is used exclusively by marketing department employees.

##### Detroit

The development site collection is used only by SharePoint administrators for internal testing.

##### Seattle

The IT site collection is used by the IT department to share content with other employees. The following servers are available in the Seattle datacenter:

- Server1 and Server5 are located in the Seattle perimeter network. End users have direct access only to these servers.
- Server2 and Server6 are optimized for high throughput.
- Server3 and Server7 have storage that is optimized for caching.
- Server4 and Server8 are not currently in use.

The servers in the Seattle datacenter are not configured for redundancy.

##### Office 365

You have an existing Office 365 tenant. You use Azure Active Directory Connect to provision the hosted environment.

#### Requirements

##### Chicago

You identify the following requirements for the Chicago office:

##### General requirements

- Chicago must remain a standalone on-premises SharePoint environment. There must be no connectivity with Office 365.
- You must deploy a new Office Online Server farm named `oos-chi.contoso.com` to the environment. This farm will be used from within the network and externally. All connections to the Office Online Server

farm must use IPsec.

**Disaster recovery requirements**

- You must use the secondary datacenter in Chicago for disaster recovery.
- You must be able to recover the Chicago.contoso.com SharePoint farm to the secondary datacenter. Any recovery operations must complete in less than five minutes if the primary datacenter fails.
- You must minimize the costs associated with deploying the disaster recovery solution.

**Dallas**

You identify the following requirements for the Dallas office:

**General requirements**

- You must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant.
- You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher.
- You must minimize the number of servers that you must add to the environment.
- You must grant users only the minimum permissions needed.
- You must ensure that http://dallas.contoso.com personal site is only used for employee personal sites.
- Only farm administrators are permitted to create site collections in the http://dallas.contoso.com web applications.

**Requirements for sales department employees**

- Sales users must be able to create child sites under the http://customer.contoso.com web application.
- Sales users must be able to create site collections.

**Seattle**

You must implement a new SharePoint environment. Employees in the IT department will use the environment to share content with other employees. You identify the following requirements for the Seattle office:

**General requirements**

- You must configure the farm by using MinRole.
- You must implement redundancy.
- Employees must be able to search all content in the farm.

**Office 365-specific requirements**

- You must support only OneDrive for Business and Profiles.
- You must minimize the number of servers that you must add to the environment.

**Other requirements**

**Atlanta**

You must deploy a new SharePoint farm at the Atlanta office. The farm must meet the following requirements:

- The farm must be highly available.
- Operating systems must support file system encryption.
- Search databases must be stored on a file system that automatically repairs corrupt files.
- Content databases must be stored on file systems that support the highest level of scalability.

**Boston**

You must upgrade the existing SharePoint farm to SharePoint 2016. Employees who use the farm must be able to continue using the farm during the upgrade process.

**Denver**

You must perform a database check before you upgrade SharePoint.

**SQL Server**

- All SharePoint environments must use dedicated SQL Servers.

- The Atlanta SharePoint farm must use SQL AlwaysOn and a group named SP16-SQLAO.
- The Atlanta SQL environment must use a SQL alias named SQL.

**Office 365**

You must use Active Directory Import to synchronize any on-premises SharePoint environments with the Office 365 tenant.

**QUESTION 70**

You need to ensure that sales department users can create sites. You grant sales department users the Full Control permission for the <http://dallas.contoso.com/sites/salessite>. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Wrong URL. Sales users must be able to create child sites under the <http://customer.contoso.com> web application.

**QUESTION 71**

You need to ensure that sales department users can create site collections. You run the following Windows PowerShell commands:

```
$w = Get-SPWebApplication http://customer.contoso.com  
$w.SelfServiceSiteCreationEnabled = $True  
$w.Update()
```

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**QUESTION 72**

You need to ensure that sales department users can create sites. You grant sales department users permissions to create personal sites in the <http://dallas.contoso.com> personal site collection. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**QUESTION 73**

Hotspot Question

You need to configure the hybrid SharePoint environments. In the table below, identify the features that you must deploy to each environment. (NOTE: Make only one selection in each column. Each correct selection is worth one point.)

## Answer area

SharePoint environment features	Dallas	Seattle
Hybrid site features	<input type="radio"/>	<input type="radio"/>
Hybrid OneDrive for Business	<input type="radio"/>	<input type="radio"/>
Cloud hybrid search	<input type="radio"/>	<input type="radio"/>
Deploy Microsoft Identity Management Server	<input type="radio"/>	<input type="radio"/>
Deploy Azure Active Directory Connect	<input type="radio"/>	<input type="radio"/>

**Answer:**

## Answer area

SharePoint environment features	Dallas	Seattle
Hybrid site features	<input checked="" type="radio"/>	<input type="radio"/>
Hybrid OneDrive for Business	<input type="radio"/>	<input checked="" type="radio"/>
Cloud hybrid search	<input type="radio"/>	<input type="radio"/>
Deploy Microsoft Identity Management Server	<input type="radio"/>	<input type="radio"/>
Deploy Azure Active Directory Connect	<input type="radio"/>	<input type="radio"/>

**Explanation:**

Dallas: You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher (= Hybrid Site Features).

Seattle: You must support only OneDrive for Business and Profiles (= Hybrid OneDrive for Business).

**QUESTION 74**

Drag and Drop Question

You need to implement the server environment for Seattle. Where should you deploy the server roles? (To answer, drag the appropriate server or servers to the correct roles. Each server or set of servers may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

**Server or Servers**

- Server1 only
- Server3 only
- Server1 and Server5
- Server3 and Server7
- Server2 only
- Server4 only
- Server2 and Server6
- Server4 and Server8

**Answer area**

Role	Server or servers
Front-end	Server or Servers
Application	Server or Servers
Distribution Cache	Server or Servers
Search	Server or Servers

**Answer:**

**Server or Servers**

- Server1 only
- Server3 only
- 
- 
- Server2 only
- Server4 only
- 
- 

**Answer area**

Role	Server or servers
Front-end	Server1 and Server5
Application	Server2 and Server6
Distribution Cache	Server3 and Server7
Search	Server4 and Server8

**QUESTION 75**

Hotspot Question

You need to plan the Atlanta farm deployment. Which file systems should you use? (To answer, select the appropriate file system from each list in the answer area.)

## Answer Area

Component	File System
Operating System	<div><div></div><div>▼</div></div> <div>NTFS</div> <div>ReFS</div>
Search database	<div><div></div><div>▼</div></div> <div>NTFS</div> <div>ReFS</div>

### QUESTION 76

You are a SharePoint Administrator for Contoso, Ltd. While doing weekly maintenance you discover that a web application at <http://sharepoint.contoso.com> has an orphan site. The orphan site is located in the WSS\_Content database. You need to resolve the issue. What should you do?

- Run the following Windows PowerShell command: `$wa = Get-SPWebApplicationhttp://sharepoint.contoso.com$wa.Sites.SyncRoot`
- In Central Administration, select the <http://sharepoint.contoso.com> web application. Select the database that contains the orphaned site. Select Remove database and click OK. Run the Windows PowerShell cmdlet: `Dismount-SPContentDB`.
- Run the following Windows PowerShell command: `$ContentDb = "WSS_Content"$db = Get-SPDatabase | where {$_.name -eq $ContentDb}Remove-SPContentDatabase $dbMount-SPContentDatabase -WebApplicaionhttp://sharepoint.contoso.com-Name $ContentDb`
- Run the following Windows PowerShell command: `$wa = Get-SPWebApplicationhttp://sharepoint.contoso.com$wa.Sites[0].Dispose();`

**Answer: B**

### QUESTION 77

You are preparing to migrate content from your SharePoint Server 2016 farm to a new location. All content is hosted within a single web application across 150 site collections. You have the following requirements:

- Users must be able to view existing content during the migration, but must not make changes.
- You must minimize the amount of time that the migration takes.
- You must return all access rights to their previous state once migration is complete.

You need to configure the SharePoint site collections. What should you configure?

- A. an information management policy
- B. privacy options
- C. Read only access for content
- D. alternate access mappings
- E. a user policy

**Answer: C**

**QUESTION 78**

You are the SharePoint administrator for a company. You plan to deploy the SharePoint sites that will be accessible from the company portal. You create the following sites:

A user named User1 will manage the sites. You must prevent all users except for User1 from creating sites and subsites. User1 must be able to delegate management of List permissions to other users. You designate a user in each division as a lead for that division's site. You need to allow the designated lead in a division to manage their division's site while minimizing administrative effort. What should you do?

- A. For each site, add the designated divisional user account to the Team owners group for that division's site.
- B. Add all divisional user accounts to the portal site's Team Owners group.
- C. Create a new SharePoint group on the Portal site named SP Division Managers. Grant the Design permission to the group and add all designated divisional lead user accounts into the group.
- D. Add the designated divisional user account for each divisional site and grant each user the Design permission.
- E. Add all the designated divisional user account to the portal site and grant each user the Design permission.

**Answer: D**

**QUESTION 79**

You manage a SharePoint 2016 farm. You need to import user profiles and photos from Active Directory to the SharePoint 2016 farm. Which tool or service should you use?

- A. User Profile service application
- B. Active Directory Import
- C. Microsoft Identity Manager
- D. Microsoft Forefront Identity Manager

**Answer: A**

**Explanation:**

<https://technet.microsoft.com/en-us/library/jj219646.aspx>

**QUESTION 80**

You have an existing SharePoint 2016 on-premises environment. You use document libraries as file archives. Users report that they cannot upload documents larger than 3 gigabytes (GB). You need to ensure that users can upload any type of file up to 4GB in size. What should you do?

- A. On each front-end server in the farm, locate the following registry key: HKEY\_LOCAL\_MACHINE \SYSTEM\CurrentControlSet\Services\WebClientParameters.  
Set the value of the FileSizeLimitInBytes key to 4294967295.  
Then, restart the Web Client service.
- B. In SharePoint Central Administration, change the value of the Maximum Upload Size property for the web application.
- C. Run the following Windows PowerShell command: `$WebApp.MaximumFileSizePerExtension.Add("MaxFileSize", 4096000)`
- D. Add the following markup to the web.config file for the web application: `<httpRuntime executionTimeout="999999" maxRequestLength="4096000" requestValidationMode="2.0" />`

**Answer: B**

#### **QUESTION 81**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage an on-premises SharePoint Server 2016 farm and SharePoint Online. You plan to deploy a SharePoint Search solution. The solution must meet the following requirements:

- Present a unified set of search results to users.
- Reduce the number of Search Servers in the farm.
- Customize the search schema for content that is stored on-premises.

You implement cloud hybrid search for SharePoint. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### **QUESTION 82**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage an on-premises SharePoint Server 2016 farm and SharePoint Online. You plan to deploy a SharePoint Search solution. The solution must meet the following requirements:

- Present a unified set of search results to users.
- Reduce the number of Search Servers in the farm.
- Customize the search schema for content that is stored on-premises.

You implement bi-directional hybrid topologies. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 83**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a

**correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.**

You manage an on-premises SharePoint Server 2016 farm and SharePoint Online. You plan to deploy a SharePoint Search solution. The solution must meet the following requirements:

- Present a unified set of search results to users.
- Reduce the number of Search Servers in the farm.
- Customize the search schema for content that is stored on-premises.

You customize search schema for content stored on on-premises at the site collection level. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 84**

**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.**

You are the SharePoint administrator for a company. The SharePoint environment is causing excessive information to be recorded in the diagnostic logs. You need to configure the SharePoint farm to only write events to the Windows event log that are equal to or more severe than the Error level. You run the following Windows PowerShell command:

```
Set-SPLogLevel -EventSeverity Error
```

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### **QUESTION 85**

**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.**

You are the SharePoint administrator for a company. The SharePoint environment is causing excessive information to be recorded in the diagnostic logs. You need to configure the SharePoint farm to only write events to the Windows event log that are equal to or more severe than the Error level. You run the following Windows PowerShell command:

```
Start-SPDiagnosticsSession -TraceLevel High
```

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 86**

**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some**

question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. The SharePoint environment is causing excessive information to be recorded in the diagnostic logs. You need to configure the SharePoint farm to only write events to the Windows event log that are equal to or more severe than the Error level. You run the following Windows PowerShell command:

```
Set-SPDiagnosticConfig -errorReportingEnable
```

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### QUESTION 87

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. The SharePoint environment is causing excessive information to be recorded in the diagnostic logs. You need to configure the SharePoint farm to only write events to the Windows event log that are equal to or more severe than the Error level. You run the following Windows PowerShell command:

```
Set-SPUsageService -LoggingEnabled $true
```

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### QUESTION 88

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features:

- Dashboards
- Scorecards
- Key Performance Indicators (KPI)

You configure Power BI. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

You need PerformancePoint Services which is a SharePoint BI tool. This is not the same as Power

BI.

[https://technet.microsoft.com/en-us/library/ee424392\(v=office.16\).aspx](https://technet.microsoft.com/en-us/library/ee424392(v=office.16).aspx)

**QUESTION 89**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features:

- Dashboards
- Scorecards
- Key Performance Indicators (KPI)

You install and configure PerformancePoint Services. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**QUESTION 90**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

**QUESTION 91**

Drag and Drop Question

A company's purchasing department creates and manages all contracts with external vendors and partners. You have the following requirements:

- You must create and save all contracts directly in a SharePoint document library. Contracts must remain on SharePoint for a period of at least seven years.
- Any employee of the purchasing department must be able to create, edit,

**[70-339 Exam Dumps](#) [70-339 Exam Questions](#) [70-339 PDF Dumps](#) [70-339 VCE Dumps](#)**

**[Back to the Source of this PDF & Get More Free Braindumps -- www.microsoftbraindumps.com](#)**

or delete a contract until the contract is marked as finalized.  
- Employees must not be permitted to delete finalized contracts.  
- You must grant purchasing department employees Contribute rights to the library.

You need to configure the SharePoint document library. What should you do? (To answer, drag the appropriate actions to the correct steps. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

### Actions

- Configure the In Place Records Management feature for the purchasing site collection.
- Configure Record Declaration settings for the Contracts document library.
- Configure a retention policy for the Contracts document library.
- Create a Disposition workflow for the Contracts document library.
- Manage item scheduling for the Contracts document library.

### Answer Area

- | Step | Action  |
|------|---|
| 1    | Create a purchasing department site collection based on the Publishing Portal template. |
| 2    | Action  |
| 3    | Configure Records Declaration settings on the purchasing department site collection.    |
| 4    | Action  |

**Answer:**

### Actions

- 
- 
- Configure a retention policy for the Contracts document library.
- Create a Disposition workflow for the Contracts document library.
- Manage item scheduling for the Contracts document library.

### Answer Area

- | Step | Action  |
|------|---|
| 1    | Create a purchasing department site collection based on the Publishing Portal template. |
| 2    | Configure the In Place Records Management feature for the purchasing site collection.   |
| 3    | Configure Records Declaration settings on the purchasing department site collection.    |
| 4    | Configure Record Declaration settings for the Contracts document library.               |

### QUESTION 92

#### Hotspot Question

You administer a SharePoint 2016 farm. You plan to implement My Site functionality. You need to configure the schedules for the timer jobs related to My Sites. For each job, which service should you modify? (To answer, select the appropriate service from each list in the answer area.)

## Answer Area

Service	Job to modify
Microsoft SharePoint Foundation Web Application	<div>▼</div> <div>My Site cleanup job</div> <div>Notification job</div> <div>Timer service recycle job</div>
Microsoft SharePoint Foundation Timer Service	<div>▼</div> <div>User Profile to SharePoint quick synchronization</div> <div>User Profile to SharePoint full synchronization</div> <div>User Profile service application - user profile change</div>

**Answer:**

## Answer Area

Service	Job to modify
Microsoft SharePoint Foundation Web Application	<div>▼</div> <div>My Site cleanup job</div> <div>Notification job</div> <div>Timer service recycle job</div>
Microsoft SharePoint Foundation Timer Service	<div>▼</div> <div>User Profile to SharePoint quick synchronization</div> <div>User Profile to SharePoint full synchronization</div> <div>User Profile service application - user profile change</div>

### QUESTION 93

Hotspot Question

You are the SharePoint administrator for Contoso, Ltd. You plan to use the contoso.com domain for the deployment of a new SharePoint environment. You need to deploy a SharePoint app to support ContosoApp1. How should you configure the URL for the SharePoint app? (To answer, select the appropriate option from each list in the answer area.)

## Answer Area

http://	<div>▼</div> <div>contoso.com</div> <div>prefix-apphash.contosoapps.com</div> <div>mysites.contoso.com</div>	/	<div>▼</div> <div>sites/web1/ContosoApp1</div> <div>ContosoApp1</div> <div>sites</div>
---------	--	---	--

**Answer:**

## Answer Area

http://	contoso.com	/	sites/web1/ContosoApp1
	prefix-apphash.contosoapps.com		ContosoApp1
	mysites.contoso.com		sites

### Explanation:

### QUESTION 94

#### Hotspot Question

Your organization sells products online. You store all product information in a secure Microsoft SQL Server database. Members of the online marketing team only access the database by using an online website administration application. The organization's sales and product development teams do not have direct access to database. Single sign-on is enabled in the environment. You identify the following requirements for the sales and product development teams:

- You must not grant teams access to the online website administration application.
- The teams must be able to access product information for reporting and customer service purposes.
- The teams must be able to create reports that include product information directly from their SharePoint Server 2016 site.
- The teams must be able to export data to Microsoft Excel.

You need to provide access to the product database while leveraging out-of-the box SharePoint functionality. Which actions should you perform in sequence? (To answer, select the appropriate options in the answer area.)

## Answer Area

Step	Action
1	<div>▼</div> <div>Create a Secure Store target application that implements individual ticket mapping.</div> <div>Create a Secure Store target application that implements group mapping.</div>
2	<div>▼</div> <div>Create an external content type.</div> <div>Create a content type that is based on a Report Builder report.</div>
3	<div>▼</div> <div>Configure alternate access mappings.</div> <div>Configure Report Server.</div> <div>Create an external list.</div>

### Answer:

## Answer Area

Step	Action
1	<div>▼</div> <div>Create a Secure Store target application that implements individual ticket mapping.</div> <div>Create a Secure Store target application that implements group mapping.</div>
2	<div>▼</div> <div>Create an external content type.</div> <div>Create a content type that is based on a Report Builder report.</div>

### QUESTION 95

Drag and Drop Question

You have a SharePoint Online environment. You enable the Delve feature. The human resources (HR) team is concerned that private, sensitive documents from the HR team site are appearing in Delve. You have created a HideFromDelve column in the library and the documents continue to appear in Delve. The column is a Yes/No type and every item in the library must have a value. You need to perform steps to configure Delve to show only specific documents and update existing items in the library with minimum effort. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

**Actions**

- Re-index the document library.
- Reset the crawl index.
- Do not specify a default value for the site column.
- Create a new crawl property named **ows\_HideFromDelve**.
- Set the default value for the site column to **No**.
- Update the value of the HideFrom-Delve property for each item.
- Set the default value for the site column to **Yes**.

**Answer Area**

**Answer:**

**Actions**

- Reset the crawl index.
- Do not specify a default value for the site column.
- Set the default value for the site column to **No**.
- Update the value of the HideFrom-Delve property for each item.

**Answer Area**

- Create a new crawl property named **ows\_HideFromDelve**.
- Set the default value for the site column to **Yes**.
- Re-index the document library.

**QUESTION 96**

Hotspot Question

A SharePoint 2016 farm includes an on-premises Enterprise Search application. You are configuring a search application crawl schedule for a Local SharePoint Sites content source. You

must configure the crawl to occur at set intervals of five minutes. You need to ensure that crawls do not prevent users from searching recently added or changed items. How should you complete the Windows PowerShell commands? (To answer, select the appropriate Windows PowerShell segments from each list in the answer area.)

**Answer Area**

```
$ssa = Get-SPEnterpriseSearchServiceApplication
$cs = Get-SPEnterpriseSearchCrawlContentSource -SearchApplication'
$ssa -Identity "Local SharePoint sites"
Set-SPEnterpriseSearchCrawlContentSource -Identity $cs
$ssa.SetProperty("IncrementalCrawlInterval",5)
```

IncrementalCrawlInterval	-ScheduleType Incremental - CrawlPriority 1
CrawlScheduleRepeatInterval	-EnableContinuousCrawls \$True
ContinuousCrawlInterval	-ScheduleType Incremental
CrawlScheduleRunEveryInterval	

**Answer:**

**Answer Area**

```
$ssa = Get-SPEnterpriseSearchServiceApplication
$cs = Get-SPEnterpriseSearchCrawlContentSource -SearchApplication'
$ssa -Identity "Local SharePoint sites"
Set-SPEnterpriseSearchCrawlContentSource -Identity $cs
$ssa.SetProperty("ContinuousCrawlInterval",5)

**NEW QUESTION 104**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. Users report that pages from the human resources (HR) division site are taking a long time to render. You need to troubleshoot the reasons for the page rendering issues. You enable the Developer Dashboard and examine the thread execution times, the SQL Server queries generated by each page, Windows Communication Foundation (WCF) calls, and URL names. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**NEW QUESTION 105**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. Users report that pages from the human resources (HR) division site are taking a long time to render. You need to troubleshoot the reasons for the page rendering issues. You monitor the SharePoint BLOB cache, the ASP.NET output cache, and the SharePoint object cache. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 106**

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company. Users report that pages from the human resources (HR) division site are taking a long time to render. You need to troubleshoot the reasons for the page rendering issues. You examine the Unified Logging Service (ULS) logs for performance issues and resource usage information. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**NEW QUESTION 107**

.....

**NEW QUESTION 115**

You are an administrator for an on-premises SharePoint 2016 farm. A partner organization needs access to some of the resources in the farm. The partner organization does not use Windows Active Directory and does not have third-party signed certificates. The partner organization does not have the personnel or expertise to set up and manage a public key infrastructure (PKI). The partner organization can supply you with a file that lists the users who need access to your SharePoint farm. All access to SharePoint resources must be authenticated. You need to configure authentication for the partner organization. What should you do?

- A. Configure forms-based authentication.
- B. Configure a federated relying party trust.
- C. Configure a cross-forest trust.
- D. Configure anonymous access.

**Answer: A**

**NEW QUESTION 116**

.....

**NEW QUESTION 118**

A college plans to enable personal sites for all users. All personal sites will be created in a dedicated web application. All staff, faculty members, and students have access to the same SharePoint environment. You need to ensure that only college staff and faculty members can create personal sites. What should you do?

- A. Manage user permissions for the User Profile service application.
- B. Define site app permissions for the intranet site collection.
- C. Manage organization subtypes for the User Profile service application.
- D. Define permission levels for the intranet collection.

**Answer: A**

**Explanation:**

<https://technet.microsoft.com/en-us/library/ee721063.aspx>

**NEW QUESTION 119**

.....

**NEW QUESTION 120**

**Hotspot**

You are an administrator for a company. You manage the company's SharePoint environment. You also manage SQL Server and file system backups. All SQL instances run SQL Server 2014 SP1. The data analytics team releases a custom reporting and analytics solution. You need to provide a backup plan for the custom reporting and analytics solution. In the table below, identify the component that you can back up for each backup method.

Component	SQL Server backups	File system backups
Web Applications	<input type="radio"/>	<input type="radio"/>
Customizations not deployed as solution packages	<input type="radio"/>	<input type="radio"/>
SharePoint list items	<input type="radio"/>	<input type="radio"/>
SharePoint content databases	<input type="radio"/>	<input type="radio"/>
SQL Server Reporting Services databases	<input type="radio"/>	<input type="radio"/>

**Answer:**

Component	SQL Server backups	File system backups
Web Applications	<input type="radio"/>	<input type="radio"/>
Customizations not deployed as solution packages	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint list items	<input type="radio"/>	<input type="radio"/>
SharePoint content databases	<input type="radio"/>	<input type="radio"/>
SQL Server Reporting Services databases	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION 121

#### Drag and Drop

You are planning to create a high availability solution for your company's SharePoint environment. The company requires:

- the shortest possible recovery time
- automatic failover
- the usage of multiple subnets

You need to recommend a solution to the company's management team. For each requirement, what should you recommend? To answer, drag the appropriate SQL Server options to the correct requirement. Each SQL Server option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

SQL Server options	Requirement	SQL Server option
a failover cluster only	Shortest possible time to recovery	SQL Server options
an AlwaysOn Availability Group only	Automatic failover	SQL Server options
a high-availability mirror only	Use multiple subnets	SQL Server options
a failover cluster, an AlwaysOn Availability Group, and a high-availability mirror.		

**Answer:**

**Answer Area**

SQL Server options	Requirement	SQL Server option
<input type="text"/>	Shortest possible time to recovery	<input type="text" value="a failover cluster only"/>
<input type="text"/>	Automatic failover	<input type="text" value="a failover cluster, an AlwaysOn Availability Group, and a high-availability mirror."/>
<input type="text" value="a high-availability mirror only"/>	Use multiple subnets	<input type="text" value="an AlwaysOn Availability Group only"/>
<input type="text"/>		

**NEW QUESTION 122**

You are the administrator for a SharePoint 2016 farm. You need to integrate Microsoft System Center Operations Manager dashboards and real-time diagnostic data with the SharePoint 2016 farm. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Configure Microsoft SharePoint Insights.
- B. Configure Visio Services.
- C. Configure System Center Integration with Office 365 by using private cloud integration.
- D. Deploy the Microsoft System Center Operations Manager SharePoint web part.

**Answer: BD**
