https://www.passleader.com/md-101.html

NEW QUESTION 108
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You redirect Windows known folders to Microsoft OneDrive for Business. Which folder will be included in the redirection?

A. Saved Games
B. Desktop
C. Music
D. Downloads

Answer: B
Explanation:
https://docs.microsoft.com/en-us/onedrive/redirect-known-folders

NEW QUESTION 109
You have a Microsoft Azure Active Directory (Azure AD) tenant. All corporate devices are enrolled in Microsoft Intune. You have a web-based application named App1 that uses Azure AD to authenticate. You need to prompt all users of App1 to agree to the protection of corporate data when they access App1 from both corporate and non-corporate devices. What should you configure?

A. Notifications in Device compliance.
B. Terms and Conditions in Device enrollment.
C. Terms of use in Conditional access.
D. an Endpoint protection profile in Device configuration.

Answer: C
Explanation:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/terms-of-use

NEW QUESTION 110
You have 100 devices that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You need to prevent users from joining their home computer to Azure AD. What should you do?

A. From the Device enrollment blade in the Intune admin center, modify the Enrollment restriction settings.
B. From the Devices blade in the Azure Active Directory admin center, modify the Device settings.
C. From the Device enrollment blade in the Intune admin center, modify the Device enrollment manages settings.
D. From the Mobility (MDM and MAM) blade in the Azure Active Directory admin center, modify the Microsoft Intune enrollment settings.

Answer: A
Explanation:
https://docs.microsoft.com/en-us/intune/enrollment-restrictions-set

NEW QUESTION 111
Your company has a Microsoft 365 subscription. A new user named Admin1 is responsible for deploying Windows 10 to computers and joining the computers to Microsoft Azure Active Directory (Azure AD). Admin1 successfully joins computers to Azure AD. Several days later, Admin1 receives the following error message: "This user is not authorized to enroll. You can try to do this again or contact your system administrator with the error code (0x801c0003)." You need to ensure that Admin1 can join computers to Azure AD and follow the principle of least privilege. What should you do?

A. Assign the Global administrator role to Admin1.
B. Modify the Device settings in Azure AD.
C. Assign the Cloud device administrator role to Admin1.
D. Modify the User settings in Azure AD.

Answer: B
Explanation:
https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal

NEW QUESTION 112
Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains computers that run Windows 10. The computers are enrolled in Microsoft Intune and Windows Analytics. Your company protects documents by using Windows Information Protection (WIP). You need to identify non-approved apps that attempt to open corporate documents. What should you use?

A. the Device Health solution in Windows Analytics
B. Microsoft Cloud App Security
C. Intune Data Warehouse
D. the App protection status report in Intune

Answer: D
Explanation:
https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-
protection/wip-learning

NEW QUESTION 113
You manage a Microsoft 365 environment that has co-management enabled. All computers run Windows 10 and are deployed by using the Microsoft Deployment Toolkit (MDT). You need to recommend a solution to deploy Microsoft Office 365 ProPlus to new computers. The latest version must always be installed. The solution must minimize administrative effort. What is the best tool to use for the deployment? (More than one answer choice may achieve the goal. Choose the best answer.)

A. Microsoft Intune
B. Microsoft Deployment Toolkit
C. Office Deployment Toolkit (ODT)
D. a Group Policy object (GPO)
E. Microsoft System Center Configuration Manager

Answer: C
Explanation:
https://docs.microsoft.com/en-us/deployoffice/overview-of-the-office-2016-deployment-tool

NEW QUESTION 114
Hotspot
Your network contains an Active Directory domain named contoso.com. The domain contains 500 computers that run Windows 7. Some of the computers are used by multiple users. You plan to refresh the operating system of the computers to Windows 10. You need to retain the personalization settings to applications before you refresh the computers. The solution must minimize network bandwidth and network storage space. Which command should you run on the computer? (To answer, select the appropriate options in the answer area.)

Answer Area

	/i MigApp.xml		/nocompress /ui :Contoso*
▼		▼	

dism.exe
scandisk.exe
scanstate.exe
usmtutils.exe

/encrypt
/genconfig:file1.xml
/hardlink
/localonly

Answer:

Answer Area

	/i MigApp.xml		/nocompress /ui :Contoso*
▼		▼	

dism.exe
scandisk.exe
scanstate.exe
usmtutils.exe

/encrypt
/genconfig:file1.xml
/hardlink
/localonly

Explanation:
https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax#how-to-use-ui-and-ue

NEW QUESTION 115
Drag and Drop
You have 100 computers that run Windows 8.1. You plan to deploy Windows 10 to the computers by performing a wipe and load installation. You need to recommend a method to retain the user settings and the user data. Which three actions should you recommend be performed in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Deploy Windows 10.

Run `loadstate.exe`.

Run `scanstate.exe`.

Restore a system image backup

Answer Area

Answer:

Actions

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Restore a system image backup

Answer Area

Run `scanstate.exe`.

Deploy Windows 10.

Run `loadstate.exe`.

Explanation:
https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios
http://itproguru.com/expert/2016/01/step-by-step-how-to-migrate-users-and-user-data-from-xp-vista-windows-7-or-8-to-windows-10-using-microsoft-tool-usmt-user-state-migration-toolkit/

NEW QUESTION 116
Your company uses Windows Autopilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2. You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You perform a local Windows Autopilot Reset.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 117
You have a Microsoft 365 subscription. A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed. You need to configure the laptop to meet the following requirements:
- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com
What should you do?

A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file.
B. Create a provisioning package (.ppkg) file and email the file to the user.
C. Create a Windows To Go workspace and ship the workspace to the user.
D. Create a Sysprep Unattend (.xml) file and email the file to the user.

Answer: B

NEW QUESTION 118
You have a Microsoft 365 subscription. All devices run Windows 10. You need to prevent users from enrolling the devices in the Windows Insider Program. What should you configure from Microsoft 365 Device Management?

A. a Windows 10 security baseline
B. an app configuration policy
C. a custom device configuration profile
D. a Windows 10 update ring
E. a device restrictions device configuration profile

Answer: D

NEW QUESTION 119
You have an Azure Active Directory (Azure AD) tenant named adatum.com. The tenant contains Windows 10 devices that are enrolled in Microsoft Intune. You create an Azure Log Analytics workspace and add the Device Health Solution to the workspace. You need to create a custom device configuration profile that will enroll the Windows 10 devices in Device Health. Which OMA-URI should you add to the profile?

A. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push
B. ./Vendor/MSFT/DMClient/Provider/MS DM Server/CommercialID

MD-101 Exam Dumps **MD-101 Exam Questions** **MD-101 PDF Dumps** **MD-101 VCE Dumps**

   C.   ./Vendor/MSFT/DMClient/Provider/MS DM Server/ManagementServerAddressList
   D.   ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push/ChannelURI

Answer: B
Explanation:
https://allthingscloud.blog/monitor-windows-10-updates-for-intune-mdm-enrolled-devices/

NEW QUESTION 120
Your company has computers that run Windows 10. The company uses Microsoft Intune to manage the computers. You have an app protection policy for Microsoft Edge. You assign the policy to a group. On a computer named Computer1, you open Microsoft Edge. You need to verify whether Microsoft Edge on Computer1 is protected by the app protection policy. Which column should you add in Task Manager?

   A.   Operating system context
   B.   UAC virtualization
   C.   Enterprise Context
   D.   Data Execution Prevention

Answer: C
Explanation:
https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/wip-app-enterprise-context
https://www.itpromentor.com/win10-mam-wip/

NEW QUESTION 121
......

NEW QUESTION 131
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). Existing on-premises computers are managed by using Microsoft System Center Configuration Manager (Current Branch). You configure contoso.com for co-management. You deploy 100 new devices that run Windows 10. The devices are joined to Azure AD and enrolled in Microsoft Intune. You need to ensure that the devices are co-managed. What should you create in Intune first?

   A.   a conditional access policy
   B.   a device compliance policy
   C.   an app for the Configuration Manager client
   D.   a device configuration profile
   E.   an app configuration policy

Answer: C
Explanation:
For new internet-based devices, you need to create an app in Intune. Deploy this app to Windows 10 devices that aren't already Configuration Manager clients. This scenario is when you have new Windows 10 devices that join Azure AD and automatically enroll to Intune. You install the Configuration Manager client to reach a co-management state.
https://docs.microsoft.com/en-us/configmgr/comanage/how-to-prepare-win10

NEW QUESTION 132
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The Active Directory domain contains 200 computers that run Windows 10. The computers are managed by using Microsoft System Center Configuration Manager (Current

Branch). You need to pilot co-management for only five of the computers. What should you create first?

A.   a domain local distribution group in Active Directory
B.   an Intune Connector for Active Directory
C.   a device collection in Configuration Manager
D.   a dynamic device group in Azure AD

Answer: C
Explanation:
The Pilot Intune setting switches the associated workload only for the devices in the pilot collection.
https://docs.microsoft.com/en-us/configmgr/comanage/tutorial-co-manage-new-devices

NEW QUESTION 133
Your company plans to deploy Windows 10 to devices that will be configured for English use and other devices that will be configured for Korean use. You need to create a single multivariant provisioning package for the planned devices. You create the provisioning package. What should you do next to add the language settings to the package?

A.   Modify the Customizations.xml file.
B.   Create a file named Languages.xml that contains a header for Korean.
C.   Modify the .ppkg file.
D.   Create a file named Languages.xml that contains a header for English.

Answer: A
Explanation:
Follow these steps to create a provisioning package with multivariant capabilities:
1. Build a provisioning package and configure the customizations you want to apply during certain conditions.
2. After you've configured the settings, save the project.
3. Open the project folder and copy the customizations.xml file to any local location.
4. Use an XML or text editor to open the customizations.xml file.
5. Edit the customizations.xml file to create a Targets section to describe the conditions that will handle your multivariant settings.
6. In the customizations.xml file, create a Variant section for the settings you need to customize.
7. Save the updated customizations.xml file and note the path to this updated file. You will need the path as one of the values for the next step.
8. Use the Windows Configuration Designer command-line interface to create a provisioning package using the updated customizations.xml.
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-multivariant

NEW QUESTION 134
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

A.   Yes
B.   No

Answer: B
Explanation:

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.
https://docs.microsoft.com/en-us/intune/protect/windows-hello

NEW QUESTION 135
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.
Does this meet the goal?

A.   Yes
B.   No

Answer: A
Explanation:
Hello for Business is an alternative sign-in method that uses Active Directory or an Azure Active Directory account to replace a password, smart card, or a virtual smart card. It lets you use a user gesture to sign in, instead of a password. A user gesture might be a PIN, biometric authentication such as Windows Hello, or an external device such as a fingerprint reader. Intune integrates with Hello for Business in two ways:
- An Intune policy can be created under Device enrollment. This policy targets the entire organization (tenant-wide). It supports the Windows AutoPilot out-of-box-experience (OOBE) and is applied when a device enrolls.
- An identity protection profile can be created under Device configuration. This profile targets assigned users and devices, and is applied during check-in.
https://docs.microsoft.com/en-us/intune/protect/windows-hello

NEW QUESTION 136
You have a Microsoft 365 subscription. You have a conditional access policy that requires multi-factor authentication (MFA) for users in a group name Sales when the users sign in from a trusted location. The policy is configured as shown in the exhibit:
......
You create a compliance policy. You need to ensure that the users are authenticated only if they are using a compliant device. What should you configure in the conditional access policy?

A.   a condition
B.   a session control
C.   a cloud app
D.   a grant control

Answer: A
Explanation:
The device state condition can be used to exclude devices that are hybrid Azure AD joined and/or devices marked as compliant with a Microsoft Intune compliance policy from an organization's Conditional Access policies. Device state is located on the Condition tab.
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-conditions#device-state

NEW QUESTION 137
You have an Azure Active Directory (Azure AD) tenant that contains a user named User1. User1

has the device shown in the following table:

......

Enterprise State Roaming is configured for User1. User1 signs in to Device4 and changes the desktop. You need to identify on which devices User1 will have a changed desktop. Which devices should you identify?

A.   Device1, Device2, Device3, and Device4.
B.   Device4 only.
C.   Device2, Device3, and Device4.
D.   Device2 and Device4.
E.   Device3 and Device4.

Answer: A
Explanation:
The requirements of Enterprise State Roaming are:
1. Windows 10, with the latest updates, and a minimum Version 1511 (OS Build 10586 or later) is installed on the device.
2. The device is Azure AD joined or hybrid Azure AD joined.
3. Ensure that Enterprise State Roaming is enabled for the tenant in Azure AD.
4. The user is assigned an Azure Active Directory Premium license.
5. The device must be restarted and the user must sign in again to access Enterprise State Roaming features.
https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-troubleshooting

NEW QUESTION 138
Your company has several Windows 10 devices that are enrolled in Microsoft Intune. You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.
Solution: You install the Company Portal app on Computer1 and use the Devices tab from the app. Does this meet the goal?

A.   Yes
B.   No

Answer: B
Explanation:
Use MDM enrolment. MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.
https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods

NEW QUESTION 139
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
Solution: From the Azure Active Directory admin center, you modify the User settings and the Device settings.
Does this meet the goal?

A.   Yes
B.   No

Answer: B

Explanation:
Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.
https://docs.microsoft.com/en-us/intune/protect/windows-hello

NEW QUESTION 140
You have a Microsoft 365 subscription. You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM). You need to deploy the Microsoft Office 365 ProPlus suite to all the computers. What should you do?

A.   From the Device Management admin center, add an app.
B.   From Microsoft Azure Active Directory (Azure AD), add an app registration.
C.   From Microsoft Azure Active Directory (Azure AD), add an enterprise application.
D.   From the Device Management admin center, create a Windows 10 device profile.

Answer: C
Explanation:
https://docs.microsoft.com/en-us/windows/client-management/mdm/enterprise-app-management#application-management-goals

NEW QUESTION 141
Hotspot
You network contains an Active Directory domain. The domain contains 200 computers that run Windows 8.1. You have a Microsoft Azure subscription. You plan to upgrade the computers to Windows 10. You need to generate an Upgrade Readiness report for the computers. What should you do? (To answer, select the appropriate options in the answer area.)
......

NEW QUESTION 142
Hotspot
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The domain contains the users shown in the following table:
......
Enterprise State Roaming is enabled for User2. You have the computers shown in the following table:
......
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
......

NEW QUESTION 143
......
