NEW QUESTION 1

A university has implemented Dynamic 365 Sales. Several departments use opportunity records to bid for funding for project within their departments. Each department's opportunities are not visible to other departments. However, there are times two departments needs to work together on an opportunity. You need to configure the security to meet the business requirements.

Solution: Use access team templates and give access to members in the two departments.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 2

A university has implemented Dynamic 365 Sales. Several departments use opportunity records to bid for funding for project within their departments. Each department's opportunities are not visible to other departments. However, there are times two departments needs to work together on an opportunity. You need to configure the security to meet the business requirements.

Solution: Use position hierarchy security and define the two departments as positions.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 3

A company implements Dynamics 365 Customer Service. The company deploys synchronous plug-ins for the PreOperation and PostOperation stages on create and for the PostOperation stage on update for processing different case type. Users experience errors when updating cases. The plug-in trace log files show that the PostOperation plug-in update of case times out after two minutes. You perform basic testing and discover that this plug-in is triggered on every update of a case. You examine the code and discover that the plug-in retrieves all columns for the updated case record performing its work. You need to reduce the number of errors. You need to achieve this goal with the test amount of changes.

Solution:

- In the Plug-in Registration tool, add a post Image to the plug-in step and include the Fields that the plug-in needs.
- Remove the retrieves statement from the plug-in code and reference the post image.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 4

A company implements Dynamics 365 Customer Service. The company deploys synchronous plug-ins for the PreOperation and PostOperation stages on create and for the PostOperation stage on update for processing different case type. Users experience errors when updating cases. The plug-in trace log files show that the PostOperation plug-in update of case times out after two minutes. You perform basic testing and discover that this plug-in is triggered on every update of a case. You examine the code and discover that the plug-in retrieves all columns for the updated case record performing its work. You need to reduce the number of errors. You need to achieve this goal with the test amount of changes.

Solution: In the Plug-in Registration tool, set filtering attributes on the plug-in to only Case Type filed.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 5
